*Insurance on goods effected at low rates; the cost added to invoice.*

NO CHARGE FOR CARTING OR SHIPPING GOODS.

 *The dimensions given are the extreme outside.*

## TO THE PUBLIC.

GAIN we have the pleasure of presenting to our Friends and Patrons our  
**ILLUSTRATED CATALOGUE AND PRICE LISTS** of

**Refrigerators, Meat Safes, Water Coolers,**

AND

**WOODENWARE,**

giving such information in connection with the cuts as will embrace all their essential advantages and superior qualities, and render them easily understood.

From 1850, the year our Mr. Mace commenced business, to the present, we have been constantly improving the construction and preserving qualities of our Refrigerators, until now we offer to the public the best Refrigerator in the market for the least money.

In the management of our business the greatest economy is practised in every department. Our stock is all bought of first parties, in large quantities and for cash. Our Lumber is thoroughly seasoned before it is introduced into the manufactory, after which it is subjected to numerous machines, wonderful in construction, rapid in execution, and perfect in work. Also in the Zinc-Working Department the most perfect machinery is adapted for use, each machine doing the work of many men, thereby enabling us to offer a perfect Refrigerator, combining Cheapness, Strength, Durability, etc., and giving the greatest beneficial results with the least expenditure of Ice, at prices defying competition.

We desire to call your attention to our "Knock-Down Meat Safes," so favorably known among the trade. They are constructed so as to be taken all apart by merely removing six screws from the top; made of well seasoned lumber, and is a very desirable article for keeping bread, pie, etc.

Woodenware, our new manufacture, will be found to comprise a large assortment, consisting of Tables, Benches, Ladders, Steps, Boards, Blacking Cases, Flower Stands, etc., etc. We have received the highest praise from all who have examined these goods, and our aim shall be to make the very best work at greatly reduced prices.

While we respectfully tender our thanks to the public for their past liberal patronage, we hope, by promptness and strict attention to the wants of our Customers, to receive a continuance, and a large and liberal increase.

Yours, very respectfully,

L. H. MACE.  
F. S. GWYER.

L. H. MACE & CO.

L. H. MACE & CO.,

MANUFACTURERS OF AND WHOLESALE DEALERS IN

REFRIGERATORS,

WITH THE

Excelsior Wrought-Iron Bottom or Ice-Rack.

PATENTED MARCH 3D, 1868, AND MARCH 23D, 1869.

KNOCK-DOWN MEAT SAFES

PATENTED JANUARY 29TH, 1867.

Water Coolers and Woodenware.

*By referring to the Cuts on the following pages you will form a very good idea of the construction of our goods, which we claim to be first-class in every respect, and at prices defying competition for as good and well-finished an article.*

**L. H. MACE & CO.**

NOTE.—A small zinc trap, called a "Siphon," is provided with each Refrigerator, and should be attached to the end of the waste-water tube under the Refrigerator.

ALL FAMILY REFRIGERATORS manufactured by L. H. MACE & CO. have labels on the covers, and none are genuine unless *fac-similes* of these are found:

## CHEST.

NO MORE LEAKY REFRIGERATORS.

MACE'S  
CHEST REFRIGERATOR,

—WITH THE—  
EXCELSIOR WROUGHT-IRON BOTTOM.

Patented March 3, 1868.

### DIRECTIONS.

Keep the Siphon on the lower end of the bottom Tube, to prevent the cold air from escaping as the waste water passes off.

Wash the interior and the shelves at least once a week with hot water and soap only, and wipe quite dry. Take off the Siphon at the time of washing. The Ice should be kept in the bottom, and should not be THROWN in, but laid with care, to save the lining from injury.

Warranted to have the Corrugated Wrought-Iron Bottom.

## Excelsior Upright Improved.

NO MORE LEAKY REFRIGERATORS.

MACE'S  
EXCELSIOR UPRIGHT IMPROVED  
REFRIGERATOR,

WITH  
EXCELSIOR WROUGHT-IRON ICE CHAMBER.

Patented March 3, 1868, and March 23, 1869.

### DIRECTIONS.

Keep the Siphon on the lower end of the Water Tube, to prevent the cold air from escaping as the waste water passes off. Wash the interior and the shelves at least once a week with hot water and soap only, and wipe quite dry. Take off the Siphon at the time of washing.

The Ice should be kept in the upper part only, and should not be thrown in, but laid with care, to save the lining from injury; and in no case put any cloth around it, as the provision chamber in such case will be much dryer.

Warranted to have the Corrugated Wrought-Iron Bottom.

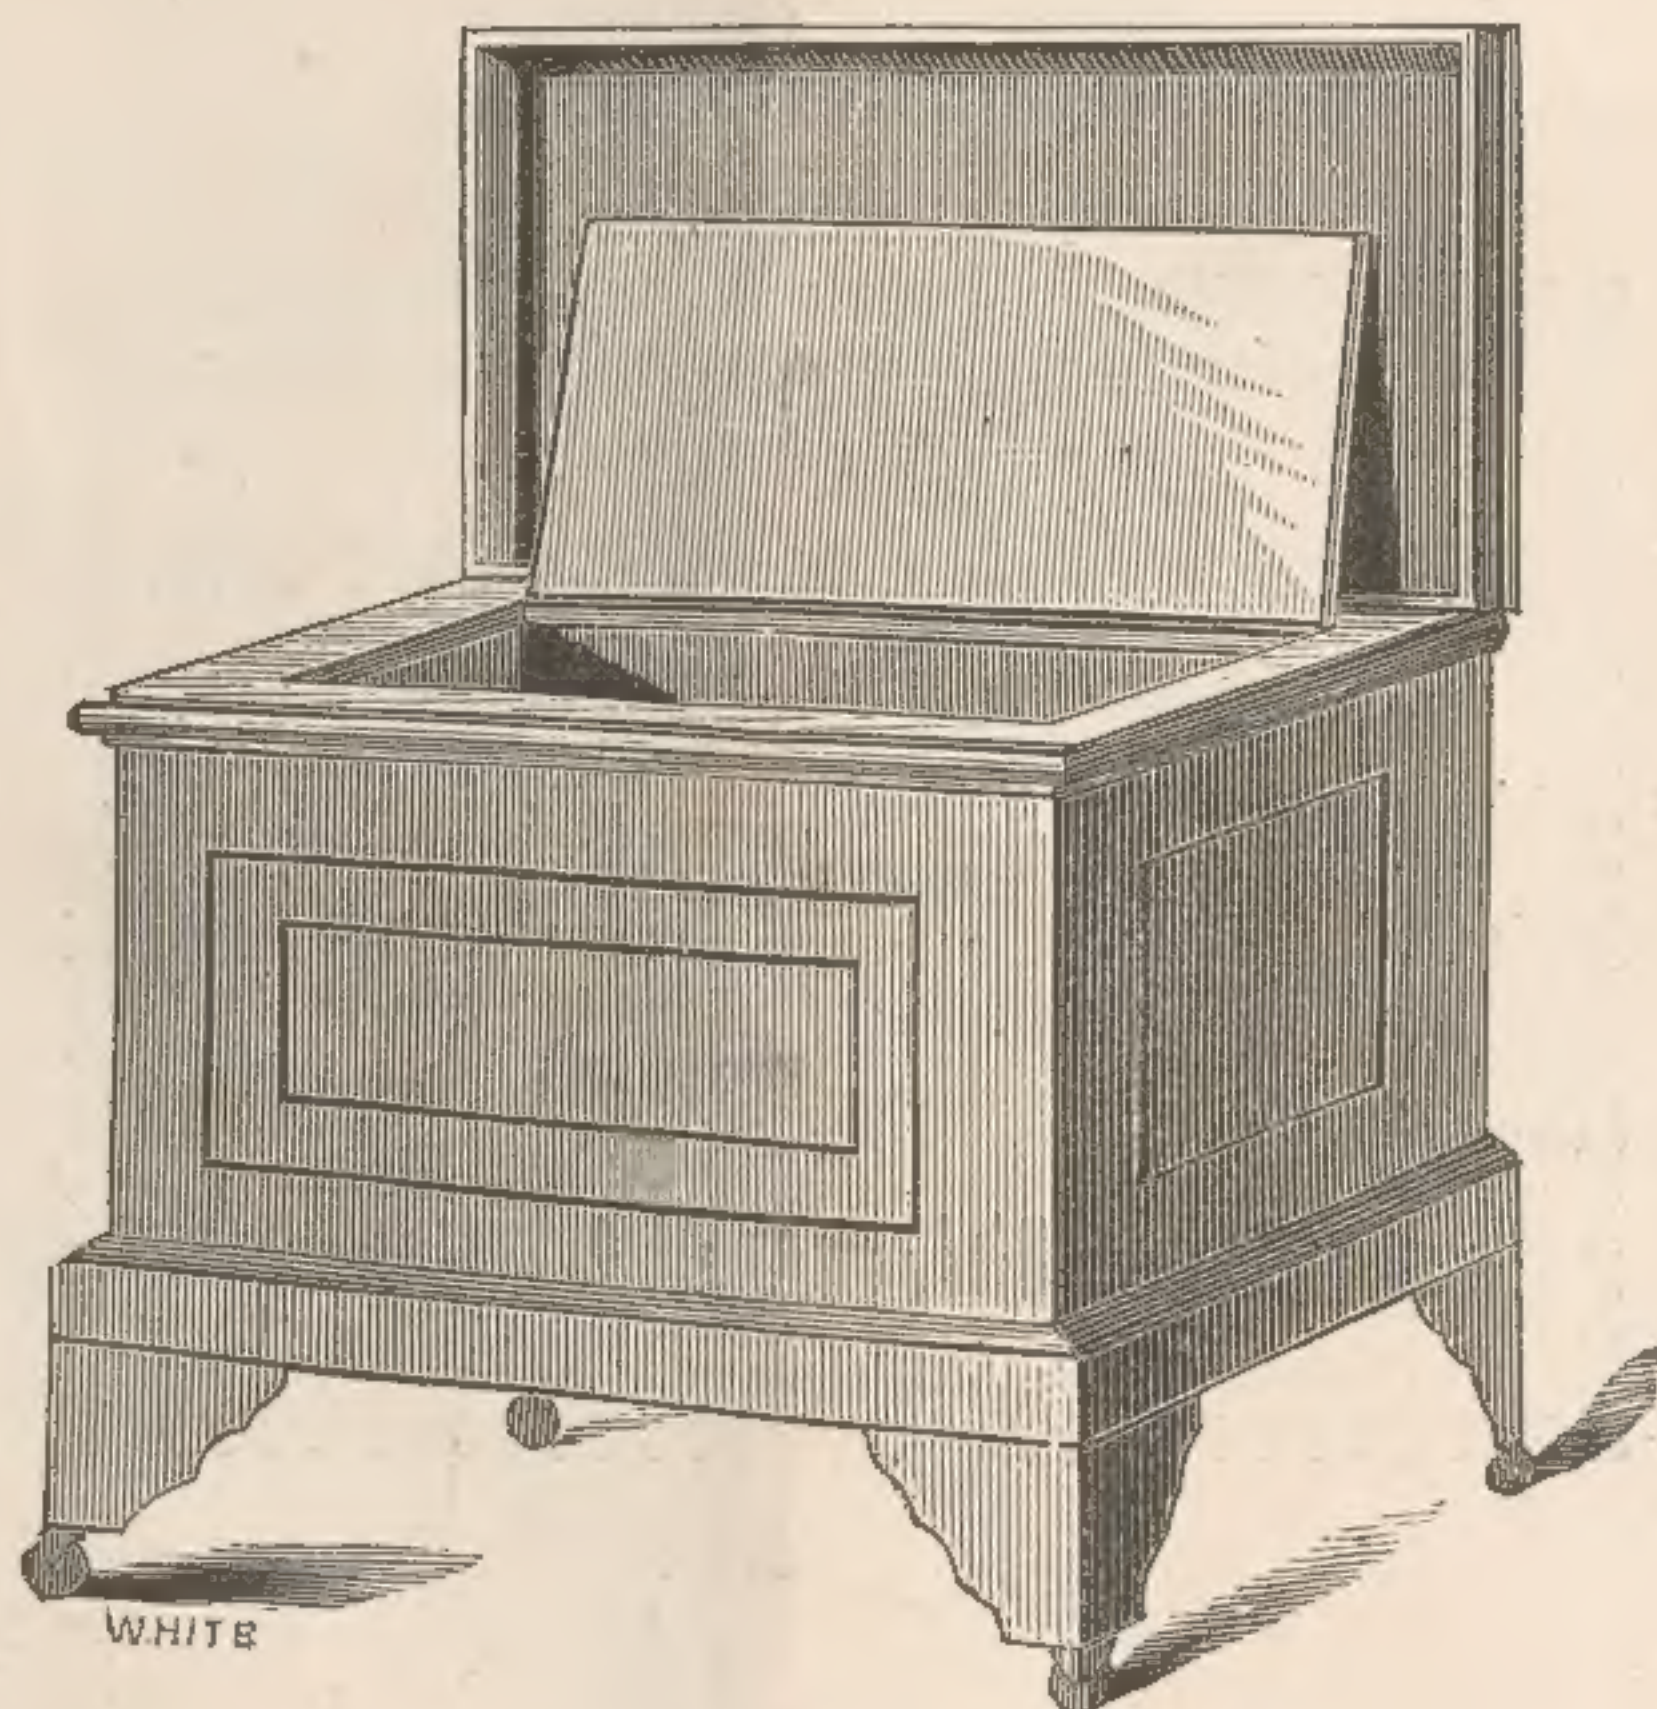

# CHEST or HORIZONTAL REFRIGERATOR

WITH THE

Excelsior Wrought-Iron Bottom or Ice-Rack.

Patented March 3d, 1868.

NO.	LENGTH.	WIDTH.	HEIGHT.	GRANITE.	Imitation Oak or B. Walnut.
1	25 inches.	18 inches.	24 inches.		
2	26 "	19 $\frac{1}{4}$ "	25 $\frac{1}{2}$ "		
3	29 "	21 "	27 "		
4	32 "	22 "	28 "		
5	35 "	23 "	29 "		
6	38 "	24 "	30 "		
7	44 "	25 "	31 "		
8	50 "	25 "	31 "		

The Ice being placed in the bottom of this Refrigerator, it consumes less Ice than any other in use, and we recommend it where Ice is very expensive, as in all tropical regions.

Castors furnished only with Grained Refrigerators Nos. 5, 6, 7 and 8 of above style.

Keep the siphon on the lower end of the tube to prevent the cold air from escaping. Refrigerators should be washed out as often as once a week, with soap and hot water, and wiped dry.

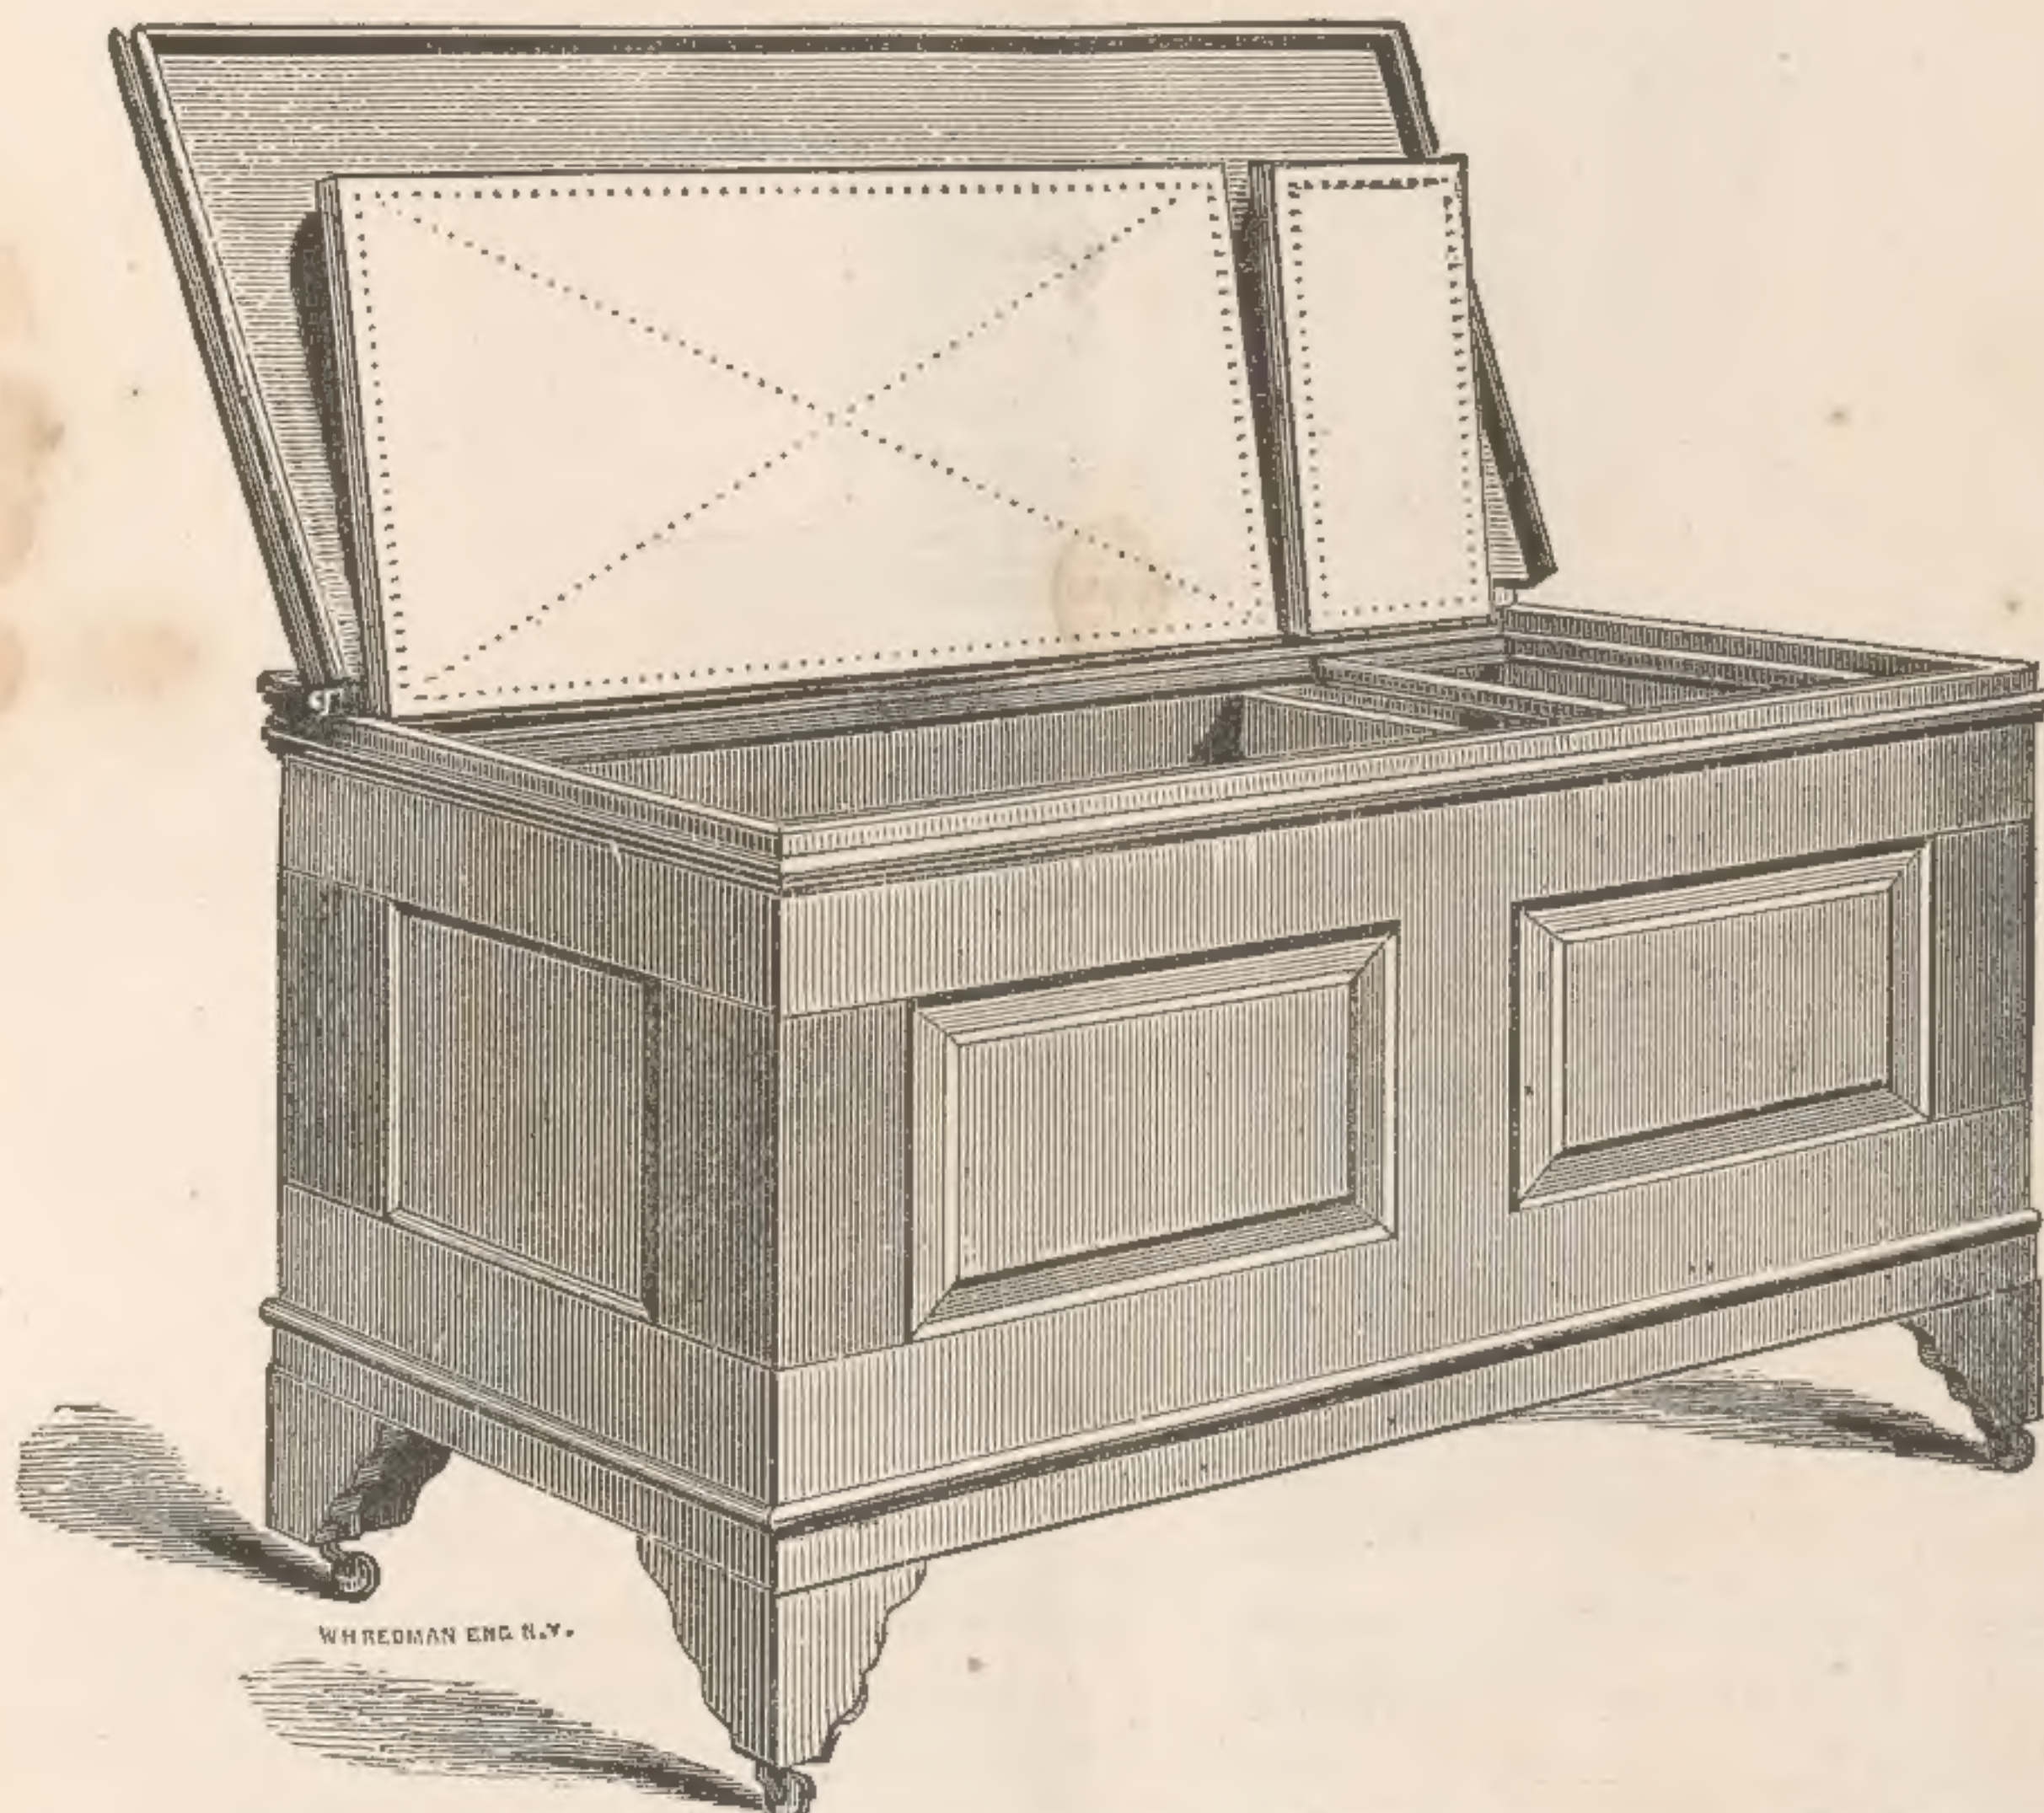

All Refrigerators manufactured by us are double-boxed.

# EXTRA SIZE CHEST or HORIZONTAL REFRIGERATOR

WITH THE  
Excelsior Wrought-Iron Bottom or Ice-Rack.

Patented March 3d, 1868.

NO.	LENGTH.	WIDTH.	HEIGHT.	Imitation Oak or B. Walnut.
9	50 inches.	25 inches.	33 inches.	
10	53 "	26 "	34 "	
11	56 "	28 "	36 "	
12	62 "	31 "	38 "	
13	68 "	31 "	38 "	

Owing to the increased demand for larger sizes of the Chest Refrigerator, we have manufactured five sizes of the above style, called

## EXTRA SIZE CHEST REFRIGERATOR.

There is a separate chamber for Ice, leaving the large chamber fitted up with shelves for provisions, finished extra strong and painted in Im. Oak and B. W. Also finished in B. Wal. and Spruce. We recommend them to give perfect satisfaction.

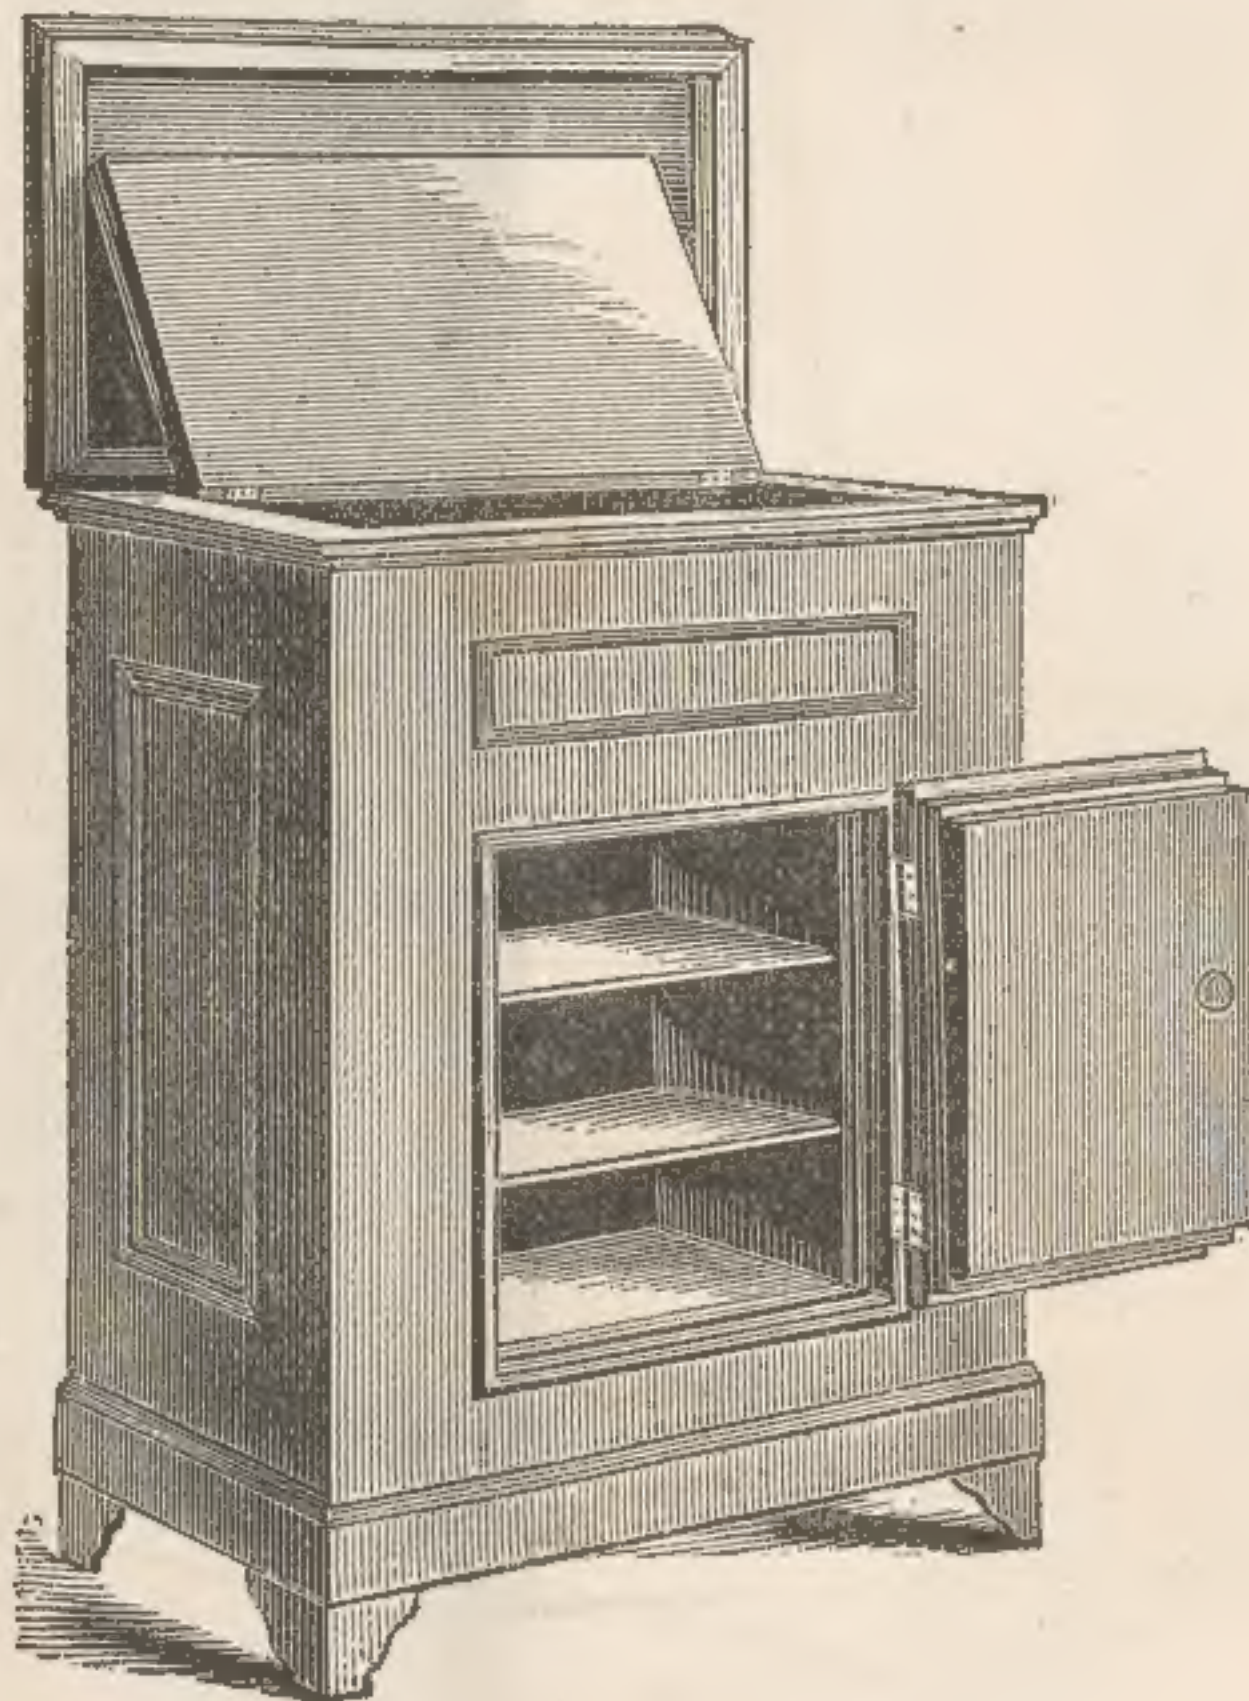

# EXCELSIOR

## UPRIGHT IMPROVED REFRIGERATOR,

WITH THE

### Excelsior Wrought-Iron Bottom or Ice-Rack.

Patented March 3d, 1868.

NO.	LENGTH.	WIDTH.	HEIGHT.	GRANITE.	Imitation Oak or B. Walnut.
1	26 inches.	18 inches.	39 inches.		
2	29 "	19 "	41 "		
3	32 "	21 "	43 "		
4	35 "	23 "	45 "		

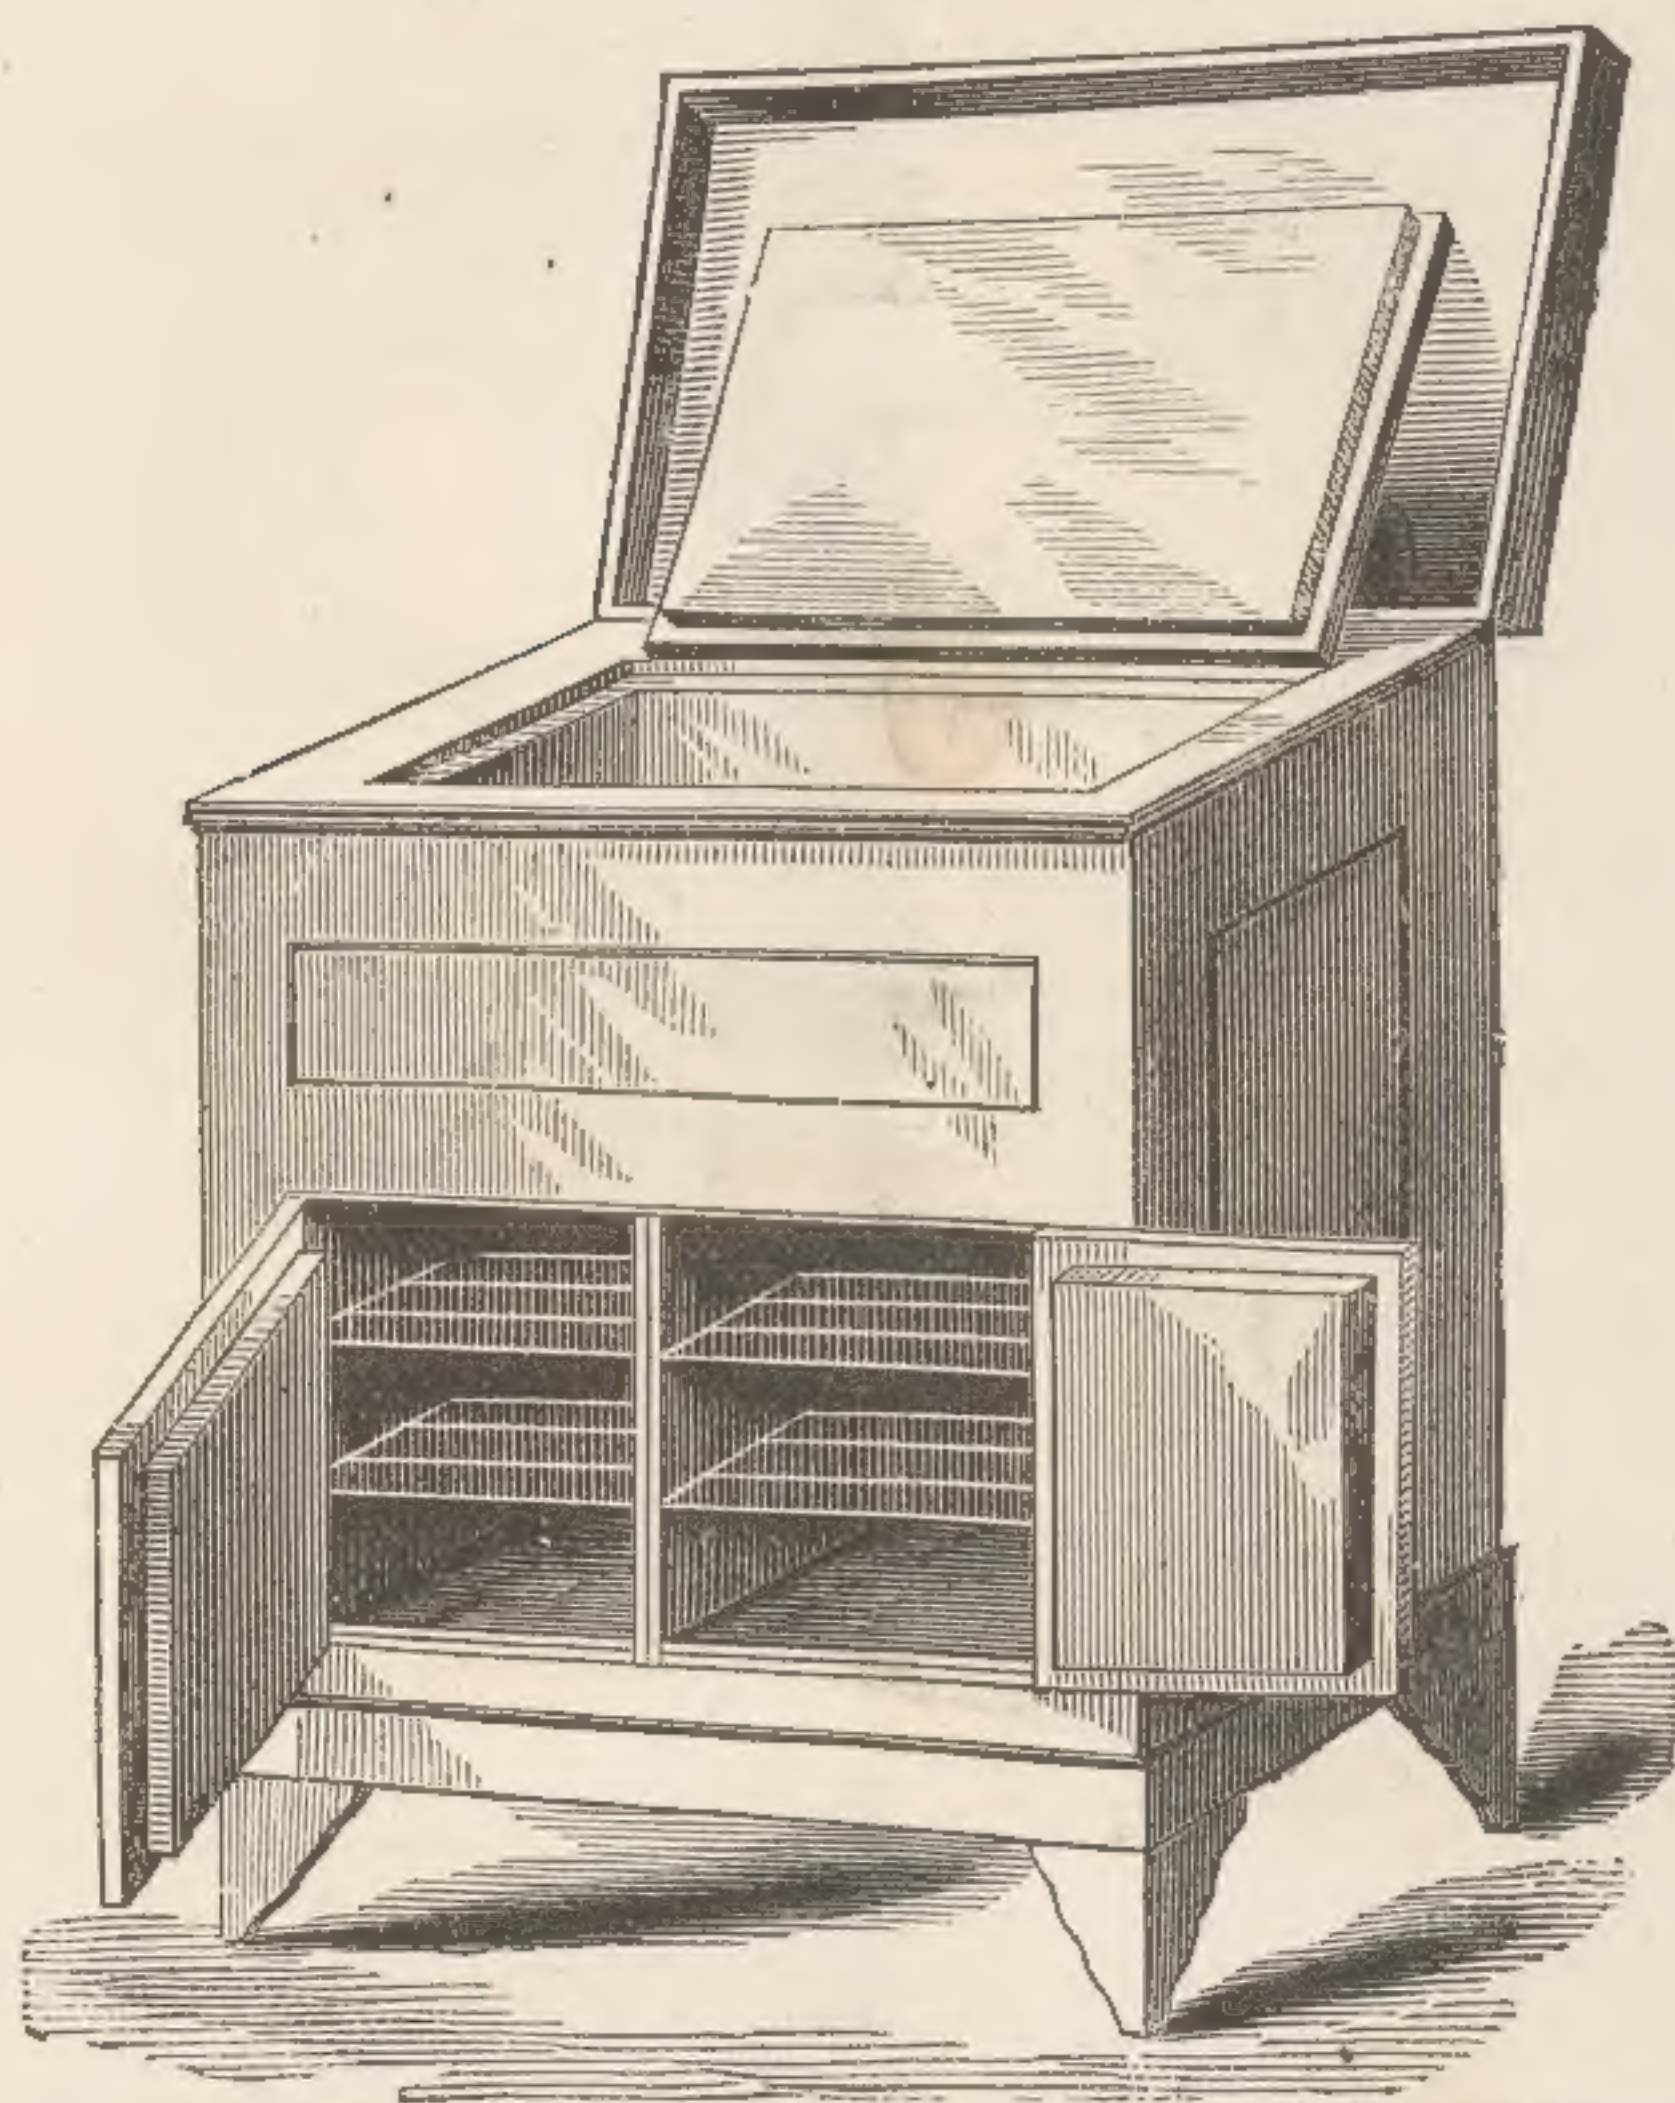

*Particular* attention is called to the fact of this being a cold dry-air Refrigerator, making it a very superior article, for the reason that its contents are always free from dampness and all impurities or odors, thereby rendering it capable of preserving articles much longer and in better condition than any other Refrigerator.

The door being in front makes it *self-ventilating*, the air inside undergoing a slight change whenever it is opened. The waste water is carried off through a pipe leading from the ice-box through the bottom of the Refrigerator, where it is caught in any receptacle placed there for the purpose. Keep the siphon on the lower end of the tube, also the door closed, to prevent the cold air from escaping.

# DOUBLE UPRIGHT IMPROVED REFRIGERATOR, TWO DOORS AND TWO APARTMENTS, WITH THE Excelsior Wrought-Iron Bottom or Ice-Rack.

Patented March 3d, 1888.

NO.	LENGTH.	WIDTH.	HEIGHT.	GRANITE.	Imitation Oak or B. Walnut.
5	38 inches.	23 inches.	47 inches.		
6	44 "	23 "	49 "		
7	50 "	24 "	49 "		
	Wine Cooler	in the top.			

Made the same as Single Upright, page 6, except that the provision chamber in these three sizes is divided into separate apartments by a zinc partition, perforated with holes to admit of the free passage of air from one side to the other, and separate doors, both of which lock with a substantial mortise lock.

Refrigerators require ice according to the quantity of provisions placed in the provision chamber. The more provisions to be cooled the more ice will be consumed, etc.

EXTRA SIZE DOUBLE  
**UPRIGHT IMPROVED REFRIGERATOR,**  
 TWO DOORS AND TWO APARTMENTS,  
 WITH  
 Plain Galvanized-Iron Bottom or Ice-Rack.

NO.	LENGTH.	WIDTH.	HEIGHT.	Imitation Oak or B. Walnut.
8	44 inches.	25 inches.	54 inches.	
9	50 "	27 "	58 "	
10	56 "	29 "	62 "	

These three sizes are similar in construction to the Single and Double Upright; the size being so much higher, the ice-chamber doors open on the front instead of the lid rising, constructed in the best manner, on the most improved plan.

There is no wood exposed to the ice or provisions; every part is either lined with zinc or gal. iron; which are the two best known substances that can be used for Refrigerators. The attention of large-sized Families, Boarding Houses, Hotels and Restaurants is respectfully called to this Refrigerator, as one particularly adapted to their use.

Made also of Black Walnut and Spruce.

# EUREKA!

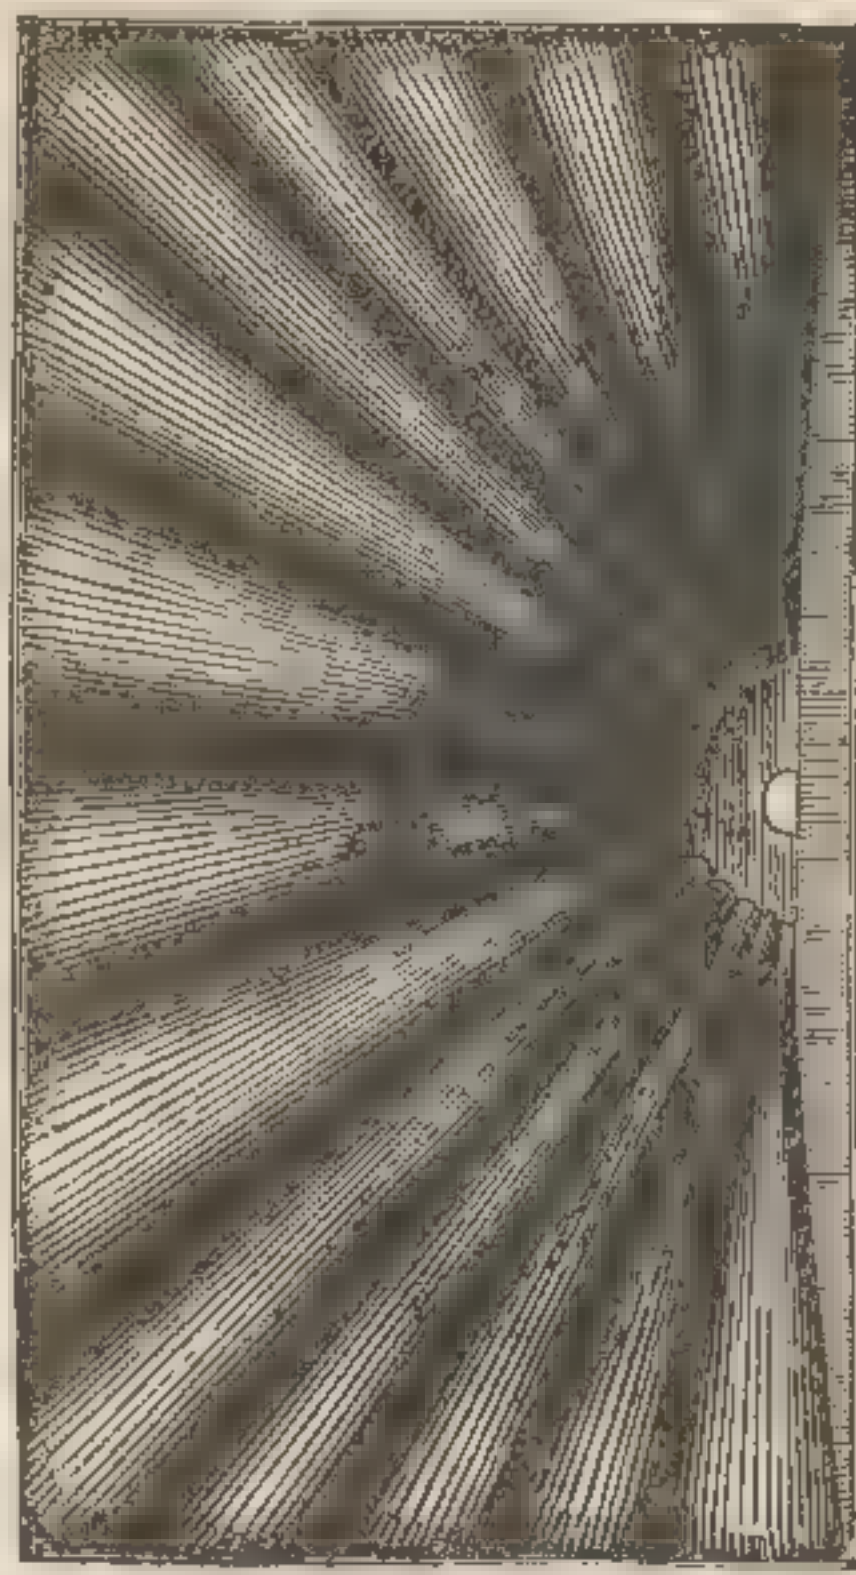

## NO MORE LEAKY REFRIGERATORS!

### THE EXCELSIOR

Corrugated Galvanized Wrought-Iron Bottom

OR

### ICE-RACK.

Patented March 3d, 1868; March 23d, 1869.

The Excelsior Bottoms correspond in size with our make of Family Refrigerators. They are impenetrable to the ice-pick with ordinary use.

Will not rust. Cannot break. Does away with all Wood Racks.

In ordering the different sizes and kinds for repairing Refrigerators, please state the number of the Refrigerator, and whether it is the Chest or Excelsior Upright Improved.

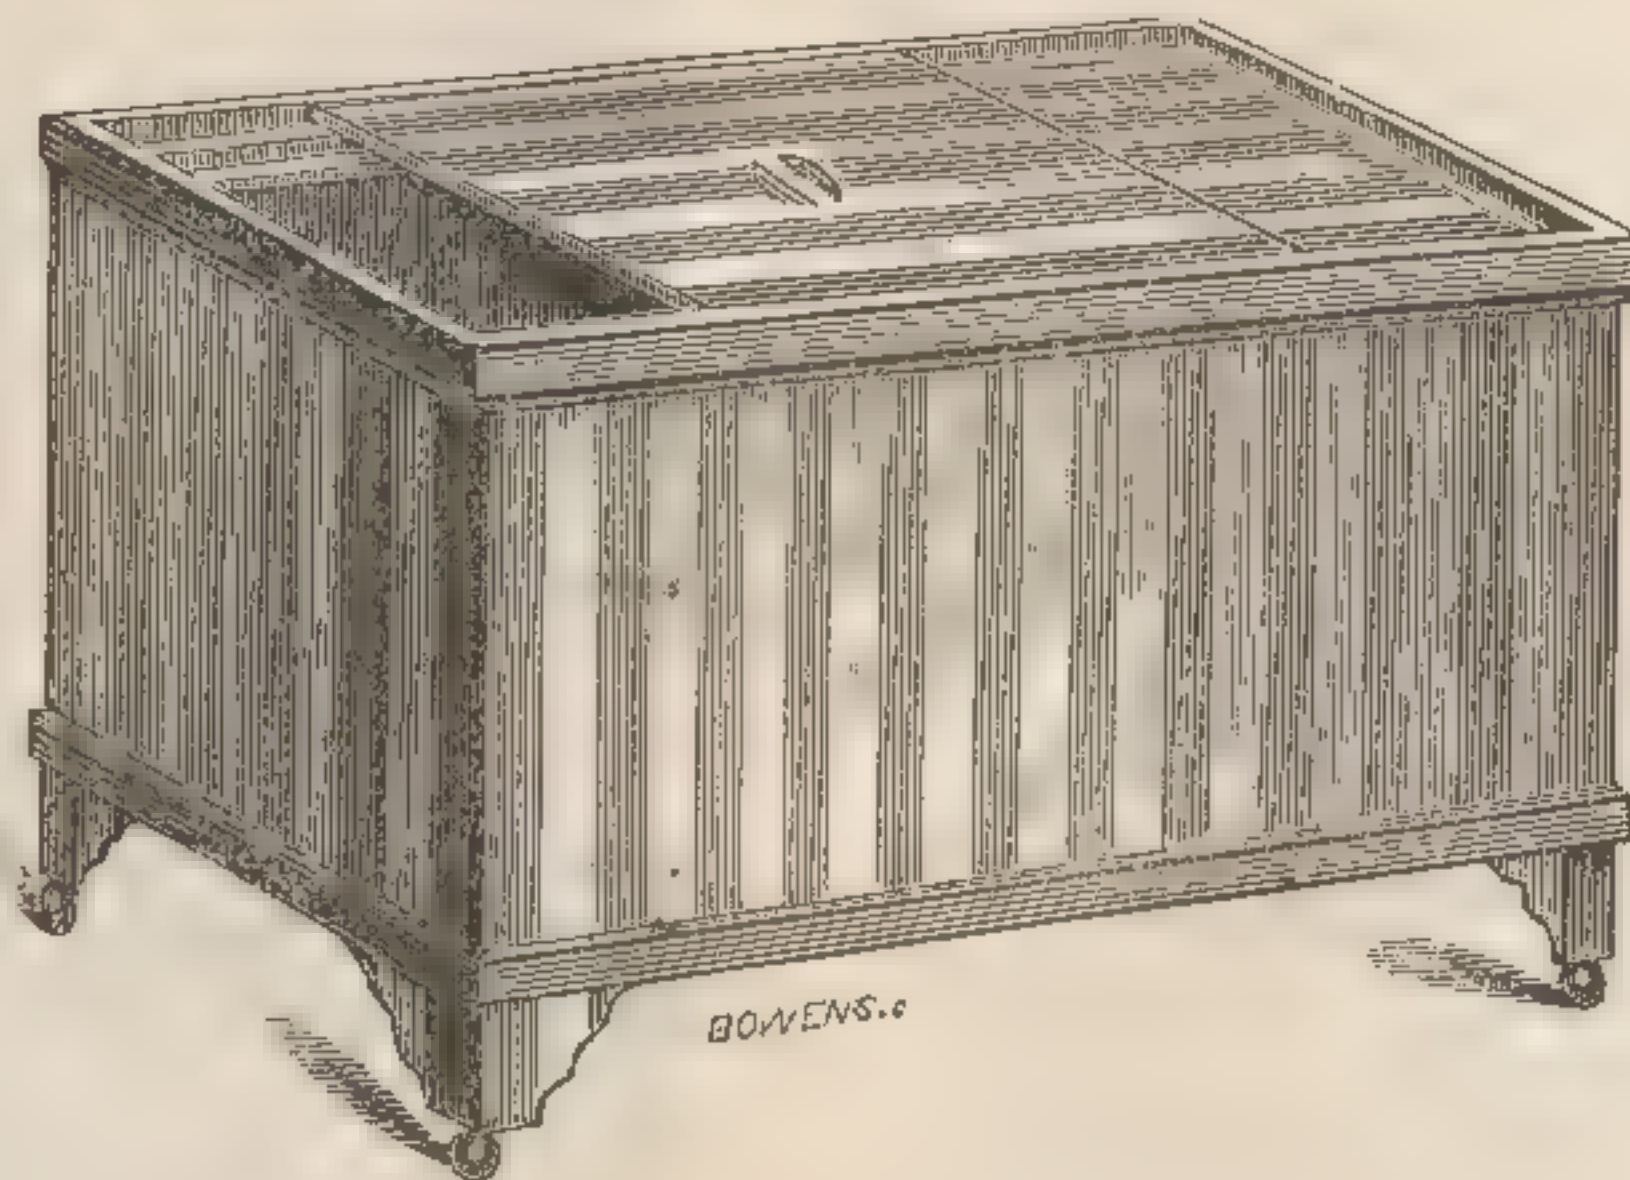

# SLIDING COVER GROCERS' CHEST,

With Galvanized-Iron Bottom.

MADE OF

BLACK WALNUT AND SPRUCE.

NO.	LENGTH.	WIDTH.	HEIGHT.	BLACK WALNUT AND SPRUCE.
1	44 inches.	25 inches.	31 inches.	
2	50 "	25 "	31 "	
3	50 "	27 "	33 "	
4	56 "	29 "	35 "	
5	62 "	31 "	37 "	
6	74 "	31 "	37 "	
7	86 "	31 "	37 "	
8	98 "	31 "	37 "	

The above cut represents a Refrigerator for the use of Butchers, Grocers, Saloons, or other purpose where a large and extra strong Refrigerator is required.

These Refrigerators are made of Black Walnut and Spruce Strips, tongued and grooved, of the best material, and put together in a substantial manner. They are constructed by making two boxes, the one being placed inside the other, leaving a space open between the two. They are then stayed by placing pieces of wood between them, the two being thoroughly nailed through, thereby rendering them firm and substantial.

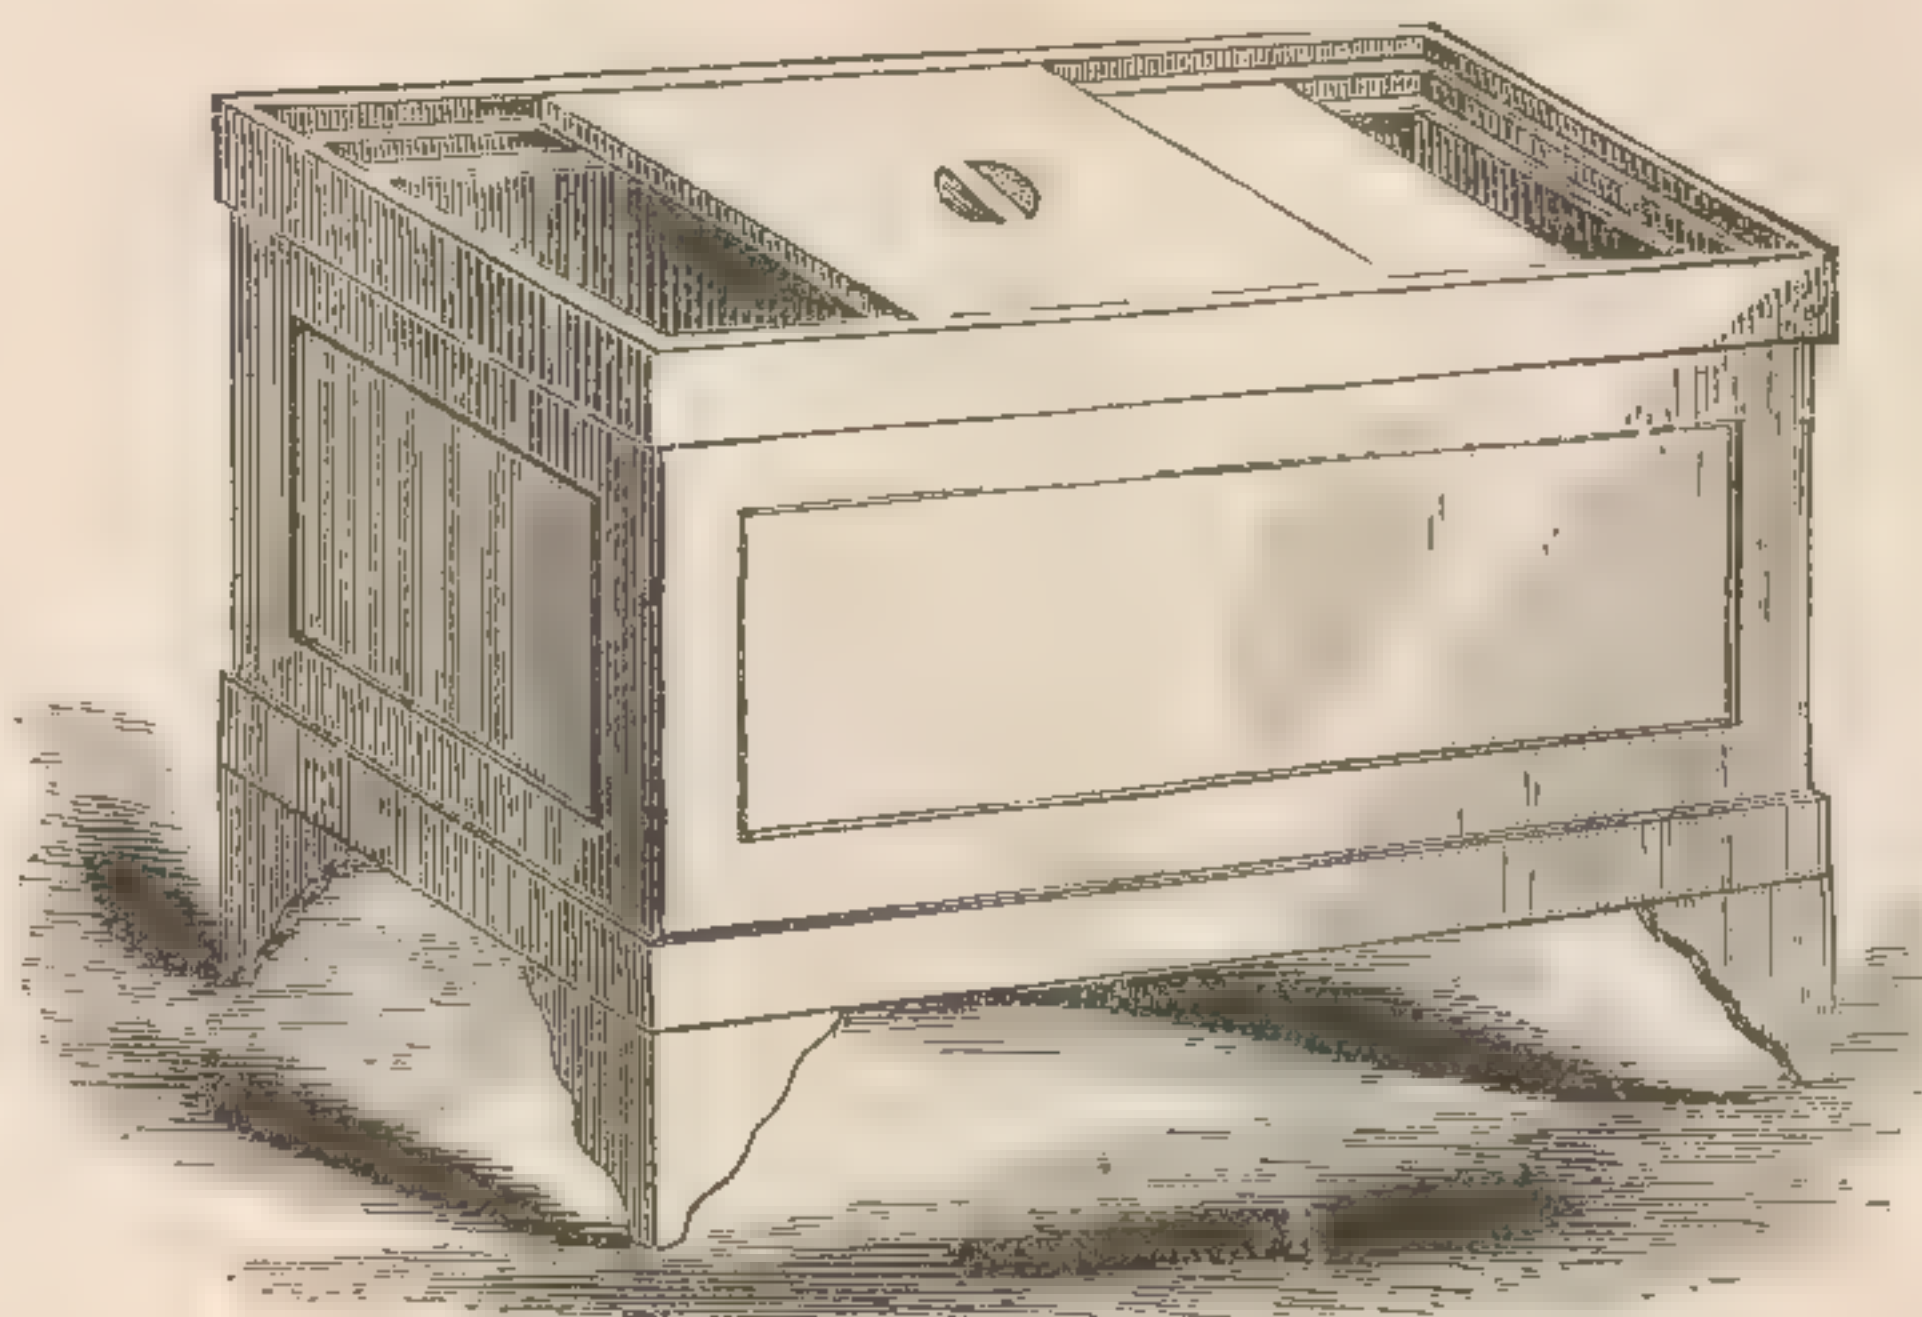

The covers of these Refrigerators slide on ways, one over the other, making it more convenient than it would be if the covers raised.

They have no shelves, cleats or other obstruction inside, but may be put in to order.

# SLIDING COVER GROCERS' CHEST,

With Galvanized-Iron Bottom.

NO.	LENGTH.	WIDTH.	HEIGHT.	IMITATION GRANITE
1	44 inches.	25 inches.	31 inches.	
2	50 "	25 "	31 "	
3	50 "	27 "	33 "	
4	56 "	29 "	35 "	
5	62 "	31 "	37 "	
6	74 "	31 "	37 "	
7	86 "	31 "	37 "	
8	98 "	31 "	37 "	

The above cut represents a Refrigerator for the use of Butchers, Grocers, Saloons, or other purpose where a large and extra strong Refrigerator is required.

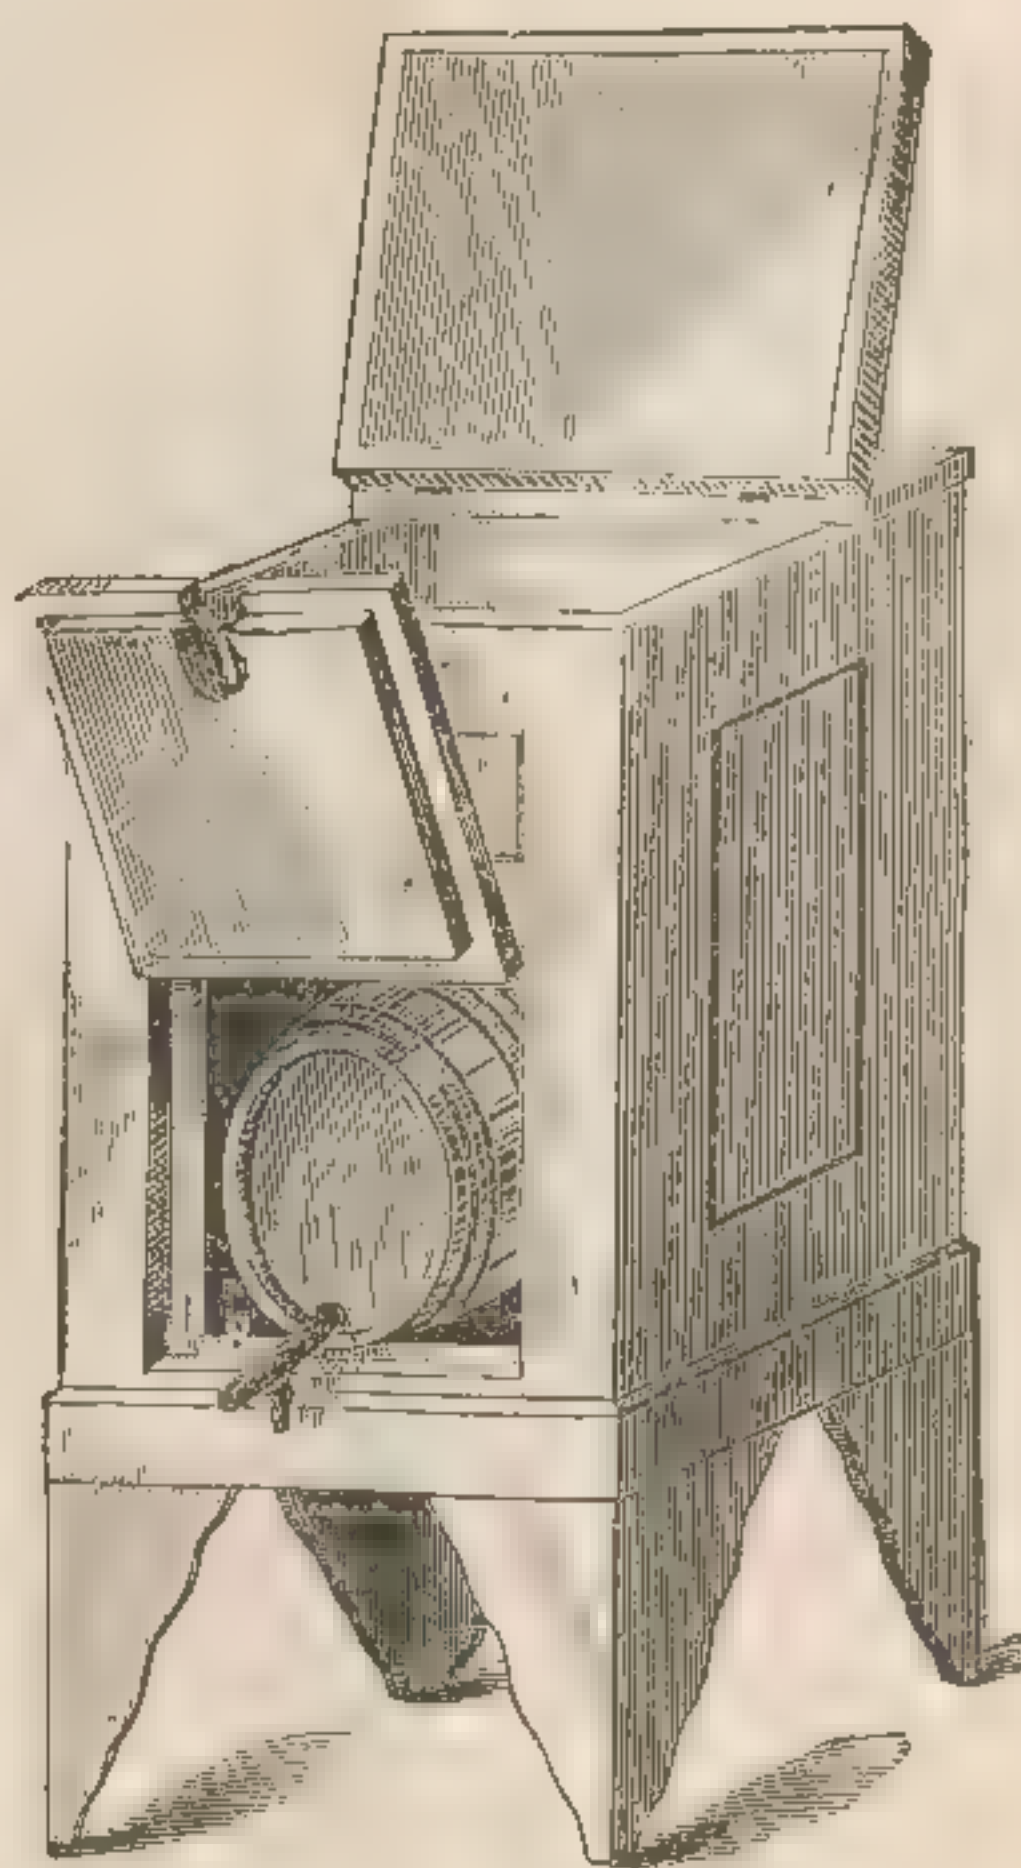

These Refrigerators are made of the best material and put together in a substantial manner. They are constructed by making two boxes, the one being placed inside the other, leaving a space open between the two. They are then stayed by placing pieces of wood between them, the two being thoroughly nailed through, thereby rendering them firm and substantial.

The covers of these Refrigerators slide on ways, one over the other, making it more convenient than it would be if the covers raised.

They have no shelves, cleats or other obstruction inside, but may be put in to order.

## LAGER BEER UPRIGHT REFRIGERATOR.

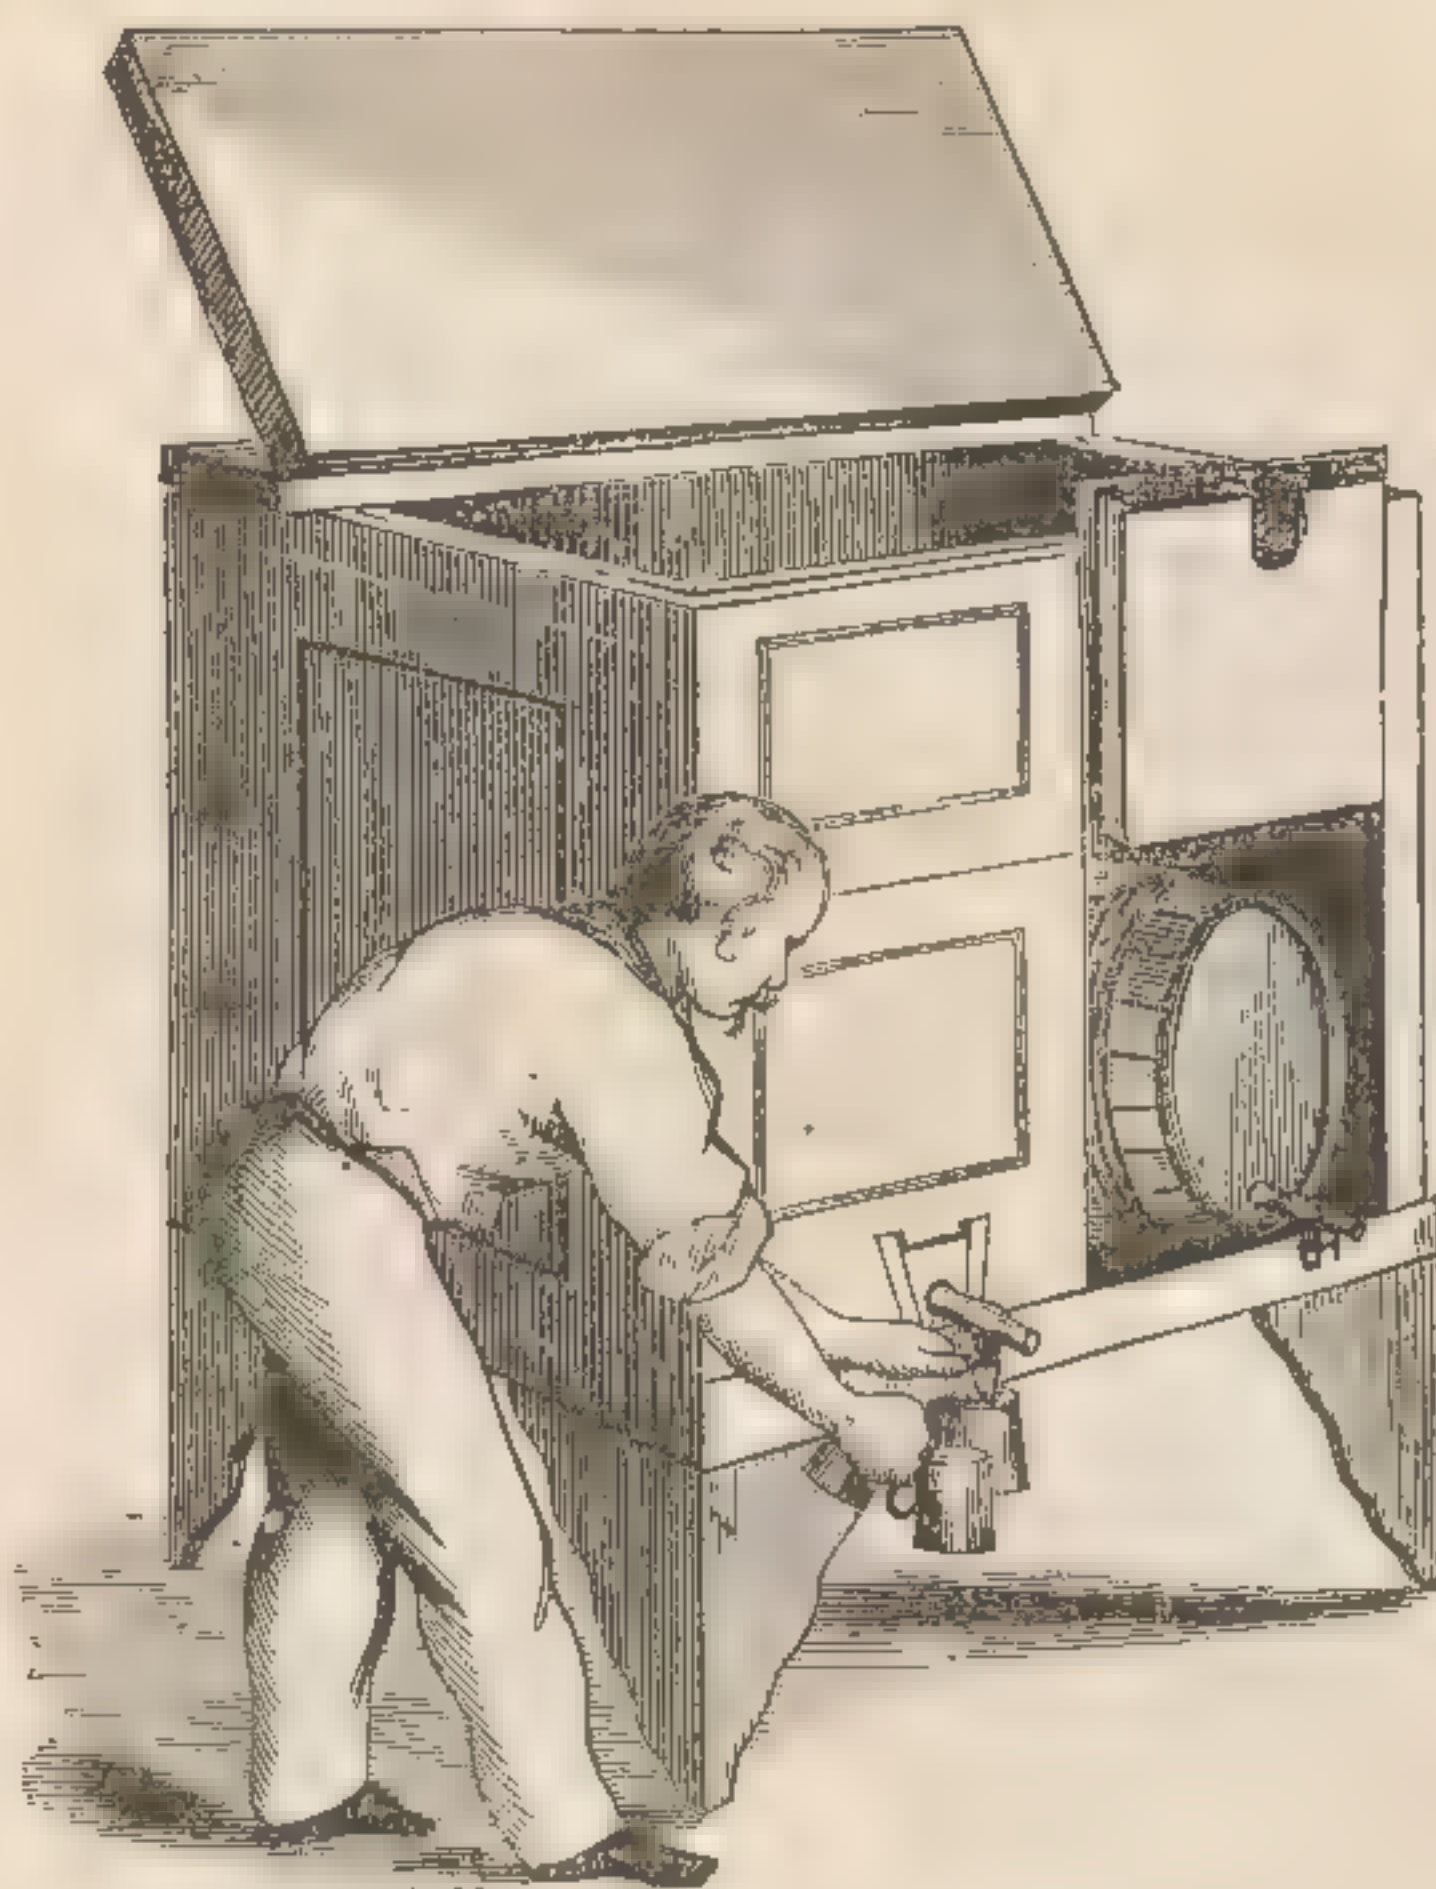

NO.	LENGTH.	WIDTH.	HEIGHT.	GRANITE.	Imitation Oak or Black Walnut, Grained.
1	26 inches.	31 inches.	52 inches.		

The above cut represents the Single Upright Lager Beer Refrigerator, used for the purpose of cooling the beer before and while drawing; the ice chamber being on top and perfectly level, and the ice-rack being open, allows the cold water and air to fall upon the keg below.

The door being open gives a view of the keg as it rests on the rack, showing that it has enough inclination to enable you to draw the beer all out without removing the keg. The ice chamber is made very strong, and is large enough to contain ice and cold cuts, bottles or other articles that may be desired to be kept cool.

## LAGER BEER UPRIGHT REFRIGERATOR.

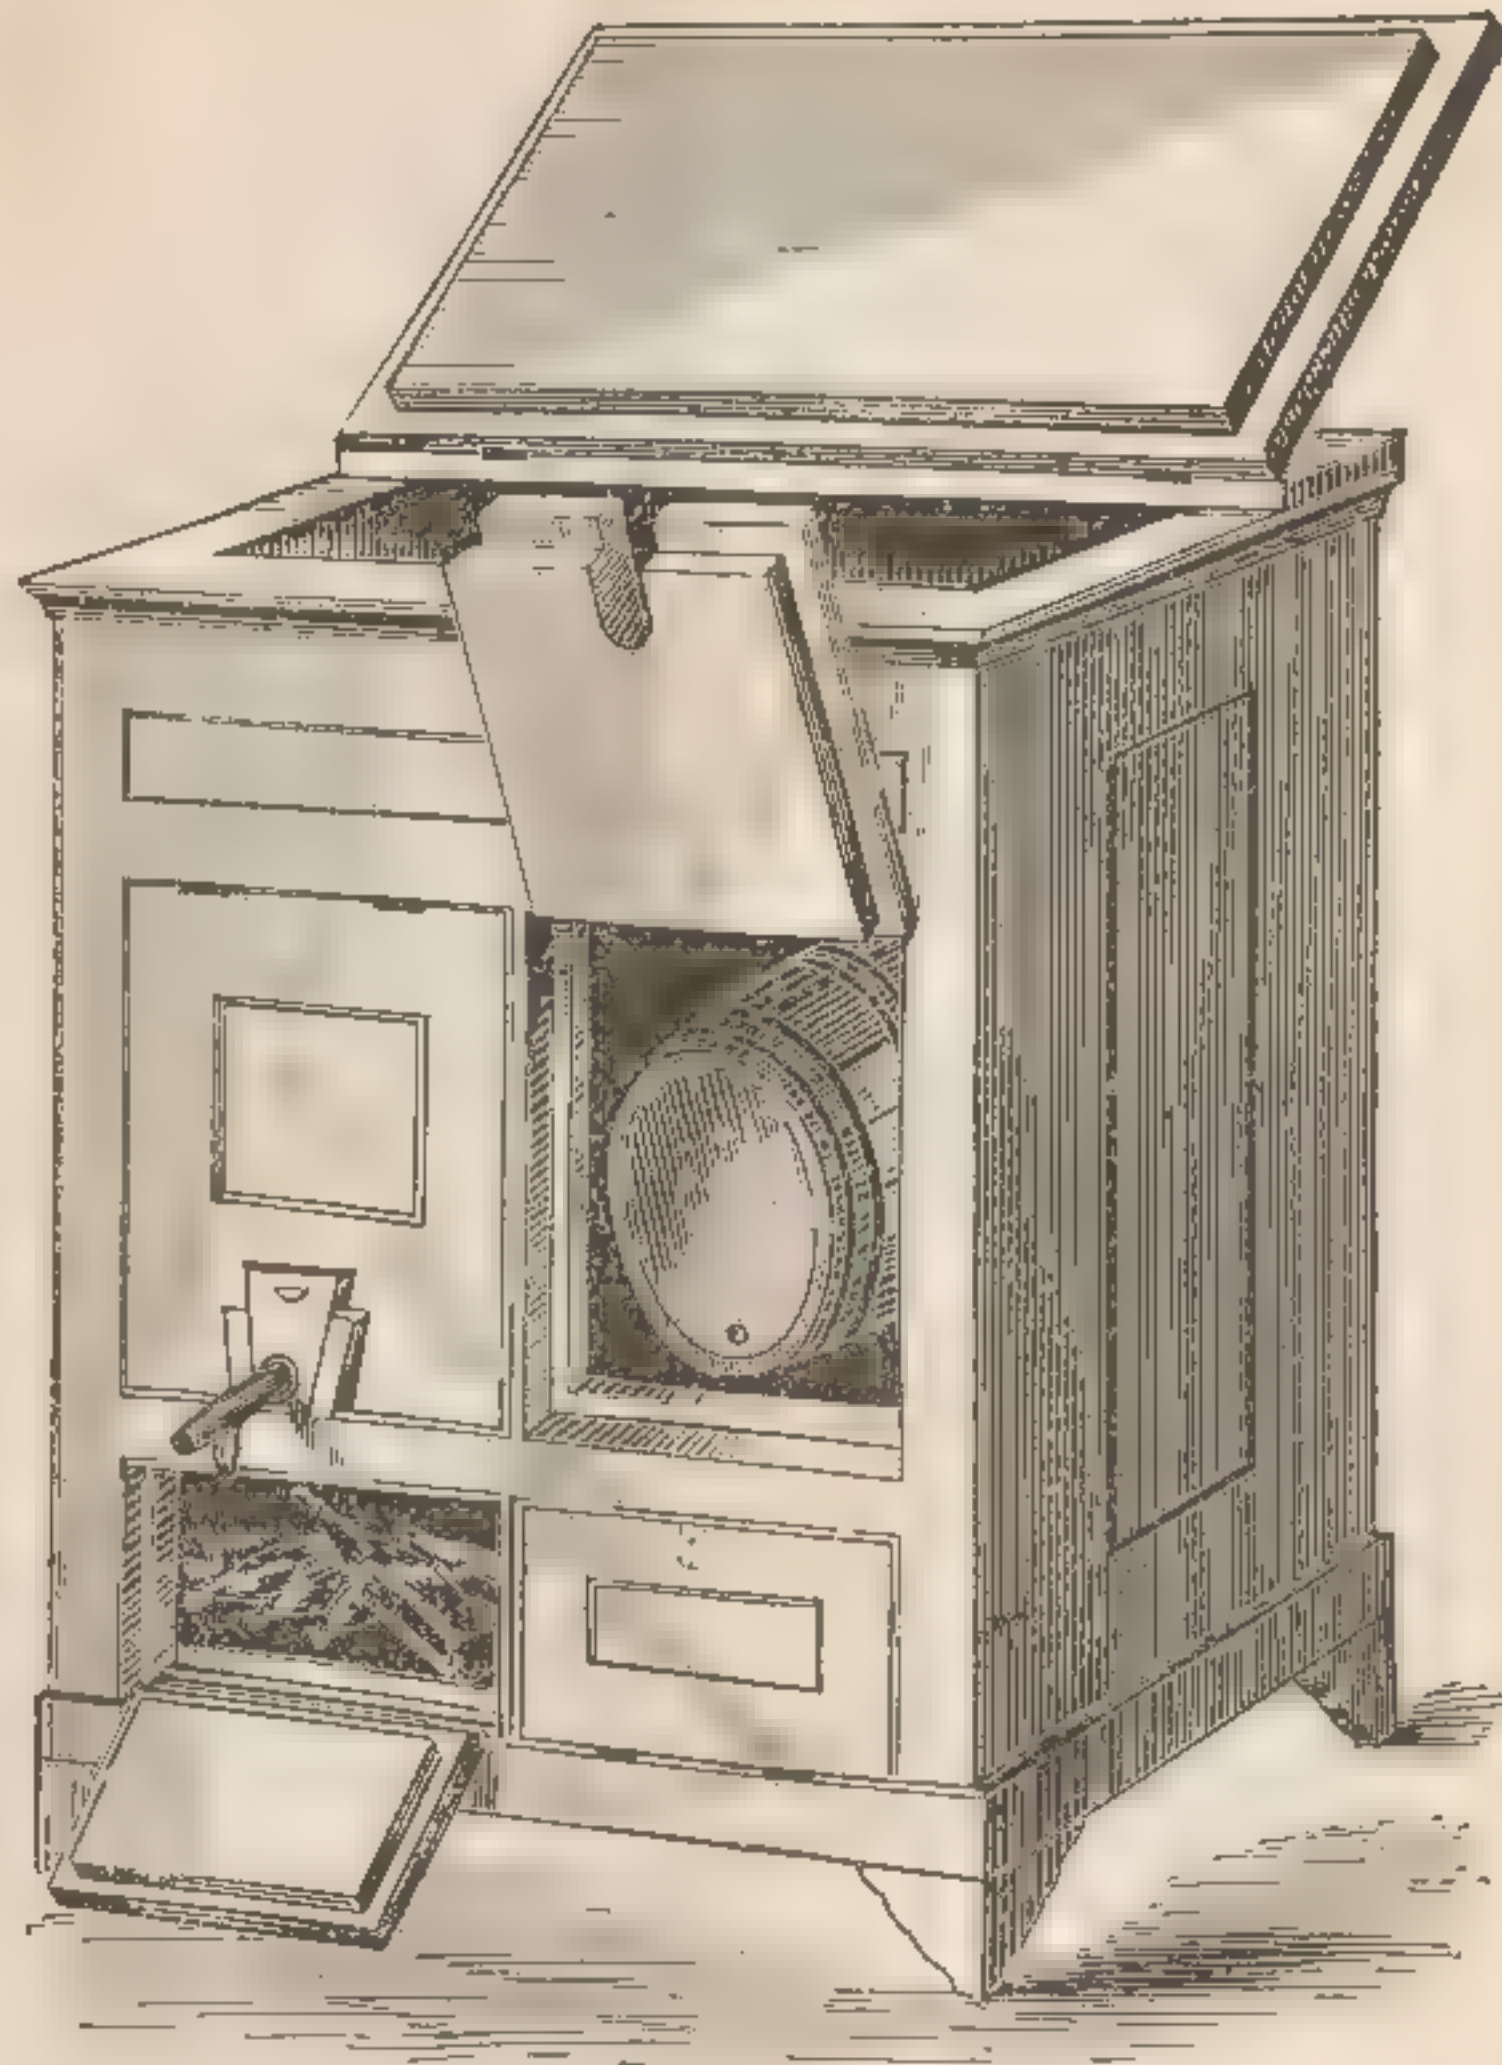

NO.	LENGTH.	WIDTH.	HEIGHT.	GRANITE.	Imitation Oak or Black Walnut, Grained.
2	44 inches.	31 inches.	52 inches.		

To avoid mistakes, also for the benefit of customers whose want of room will not permit them to keep on hand "LAGER BEER REFRIGERATORS," we present a cut of each size that we manufacture.

The above Refrigerator does not differ from the former in construction, except being large enough to contain two kegs instead of one, which is a great saving where a keg is wanted every hour or two—one keg cooling while the other is being drawn from—thus being always cool.

## LAGER BEER AND WINE COOLER.

NO.	LENGTH.	WIDTH.	HEIGHT.	Imitation Oak or Black Walnut, Grained.
3	44 inches.	31 inches.	58 inches.	

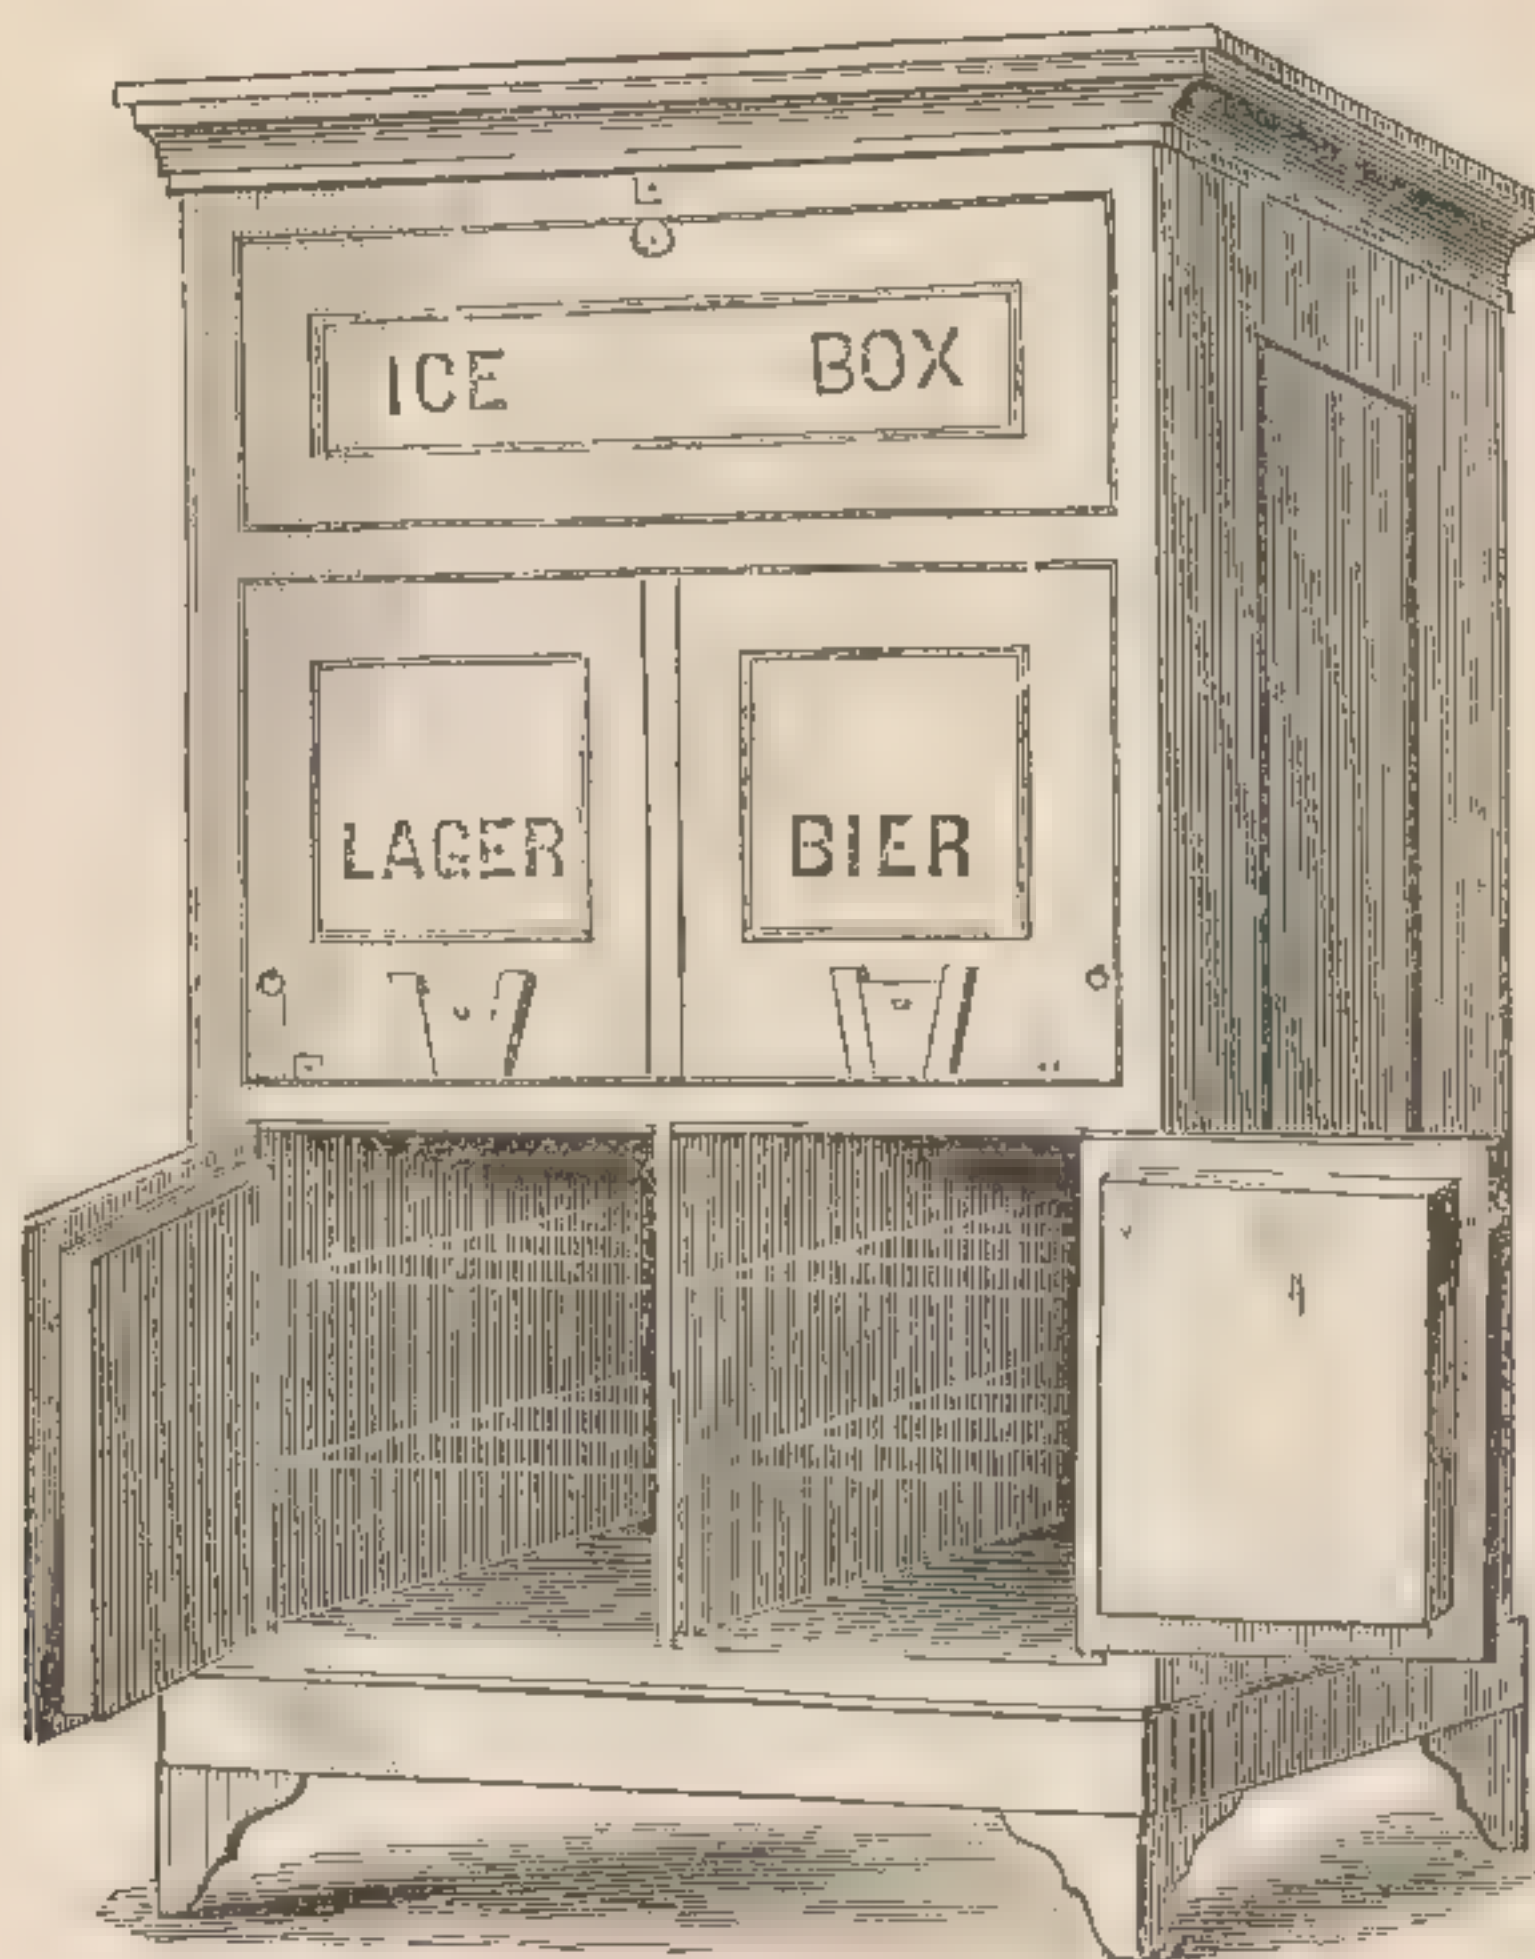

Great attention has been paid to the construction of these Refrigerators to make them strong and convenient, each chamber being by itself, and the doors so hung on their hinges as not to interfere with one another.

Lager Beer Refrigerators made to order at short notice.

# COMBINATION LAGER BEER REFRIGERATOR.

MADE OF  
BLACK WALNUT AND SPRUCE.

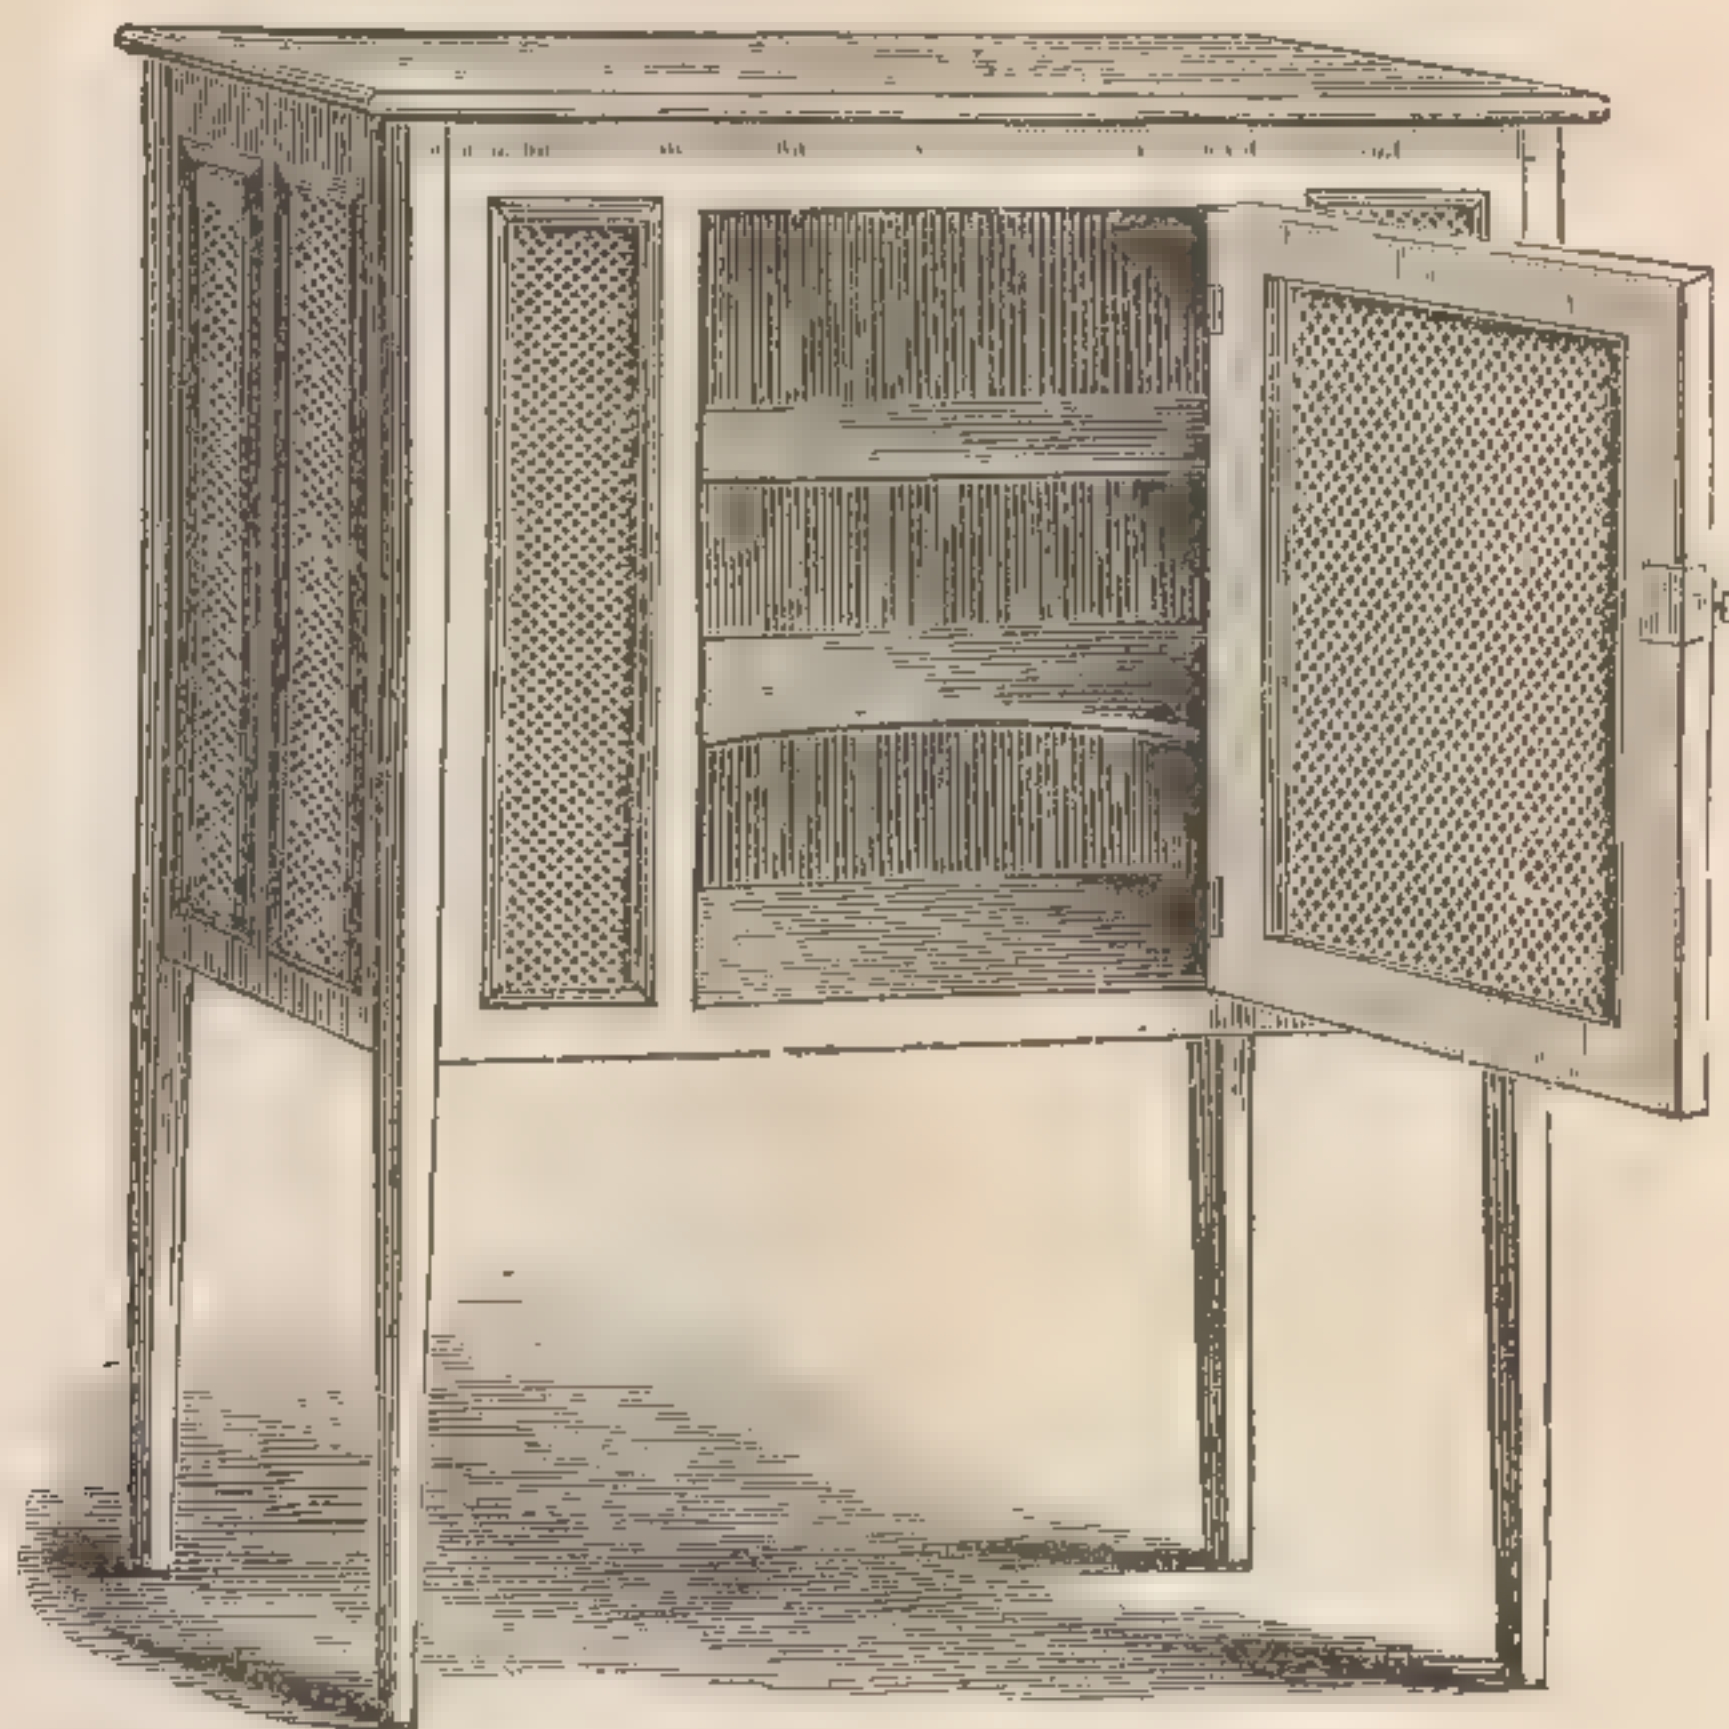

NO.	LENGTH.	WIDTH.	HEIGHT.	Black Walnut and Spruce.
4	44 inches.	31 inches.	74 inches.	

The above cut represents the largest size of "LAGER BEER REFRIGERATORS" kept on hand. They are made very substantial, of Black Walnut and Spruce, with nickel-plated trimmings. The lower part is a provision chamber, which can also be used for cooling two kegs of Beer simply by removing the shelves, thus holding four kegs.

# SINGLE MEAT SAFES. KNOCK-DOWN.

Patented January 29th, 1867.

NO.	LENGTH.	WIDTH.	HEIGHT	Imitation Oak.
1	30 inches.	16 inches.	46 inches.	
2	34 "	17 "	48 "	
3	38 "	18 "	50 "	
4	42 "	19 "	52 "	
5	46 "	20 "	54 "	

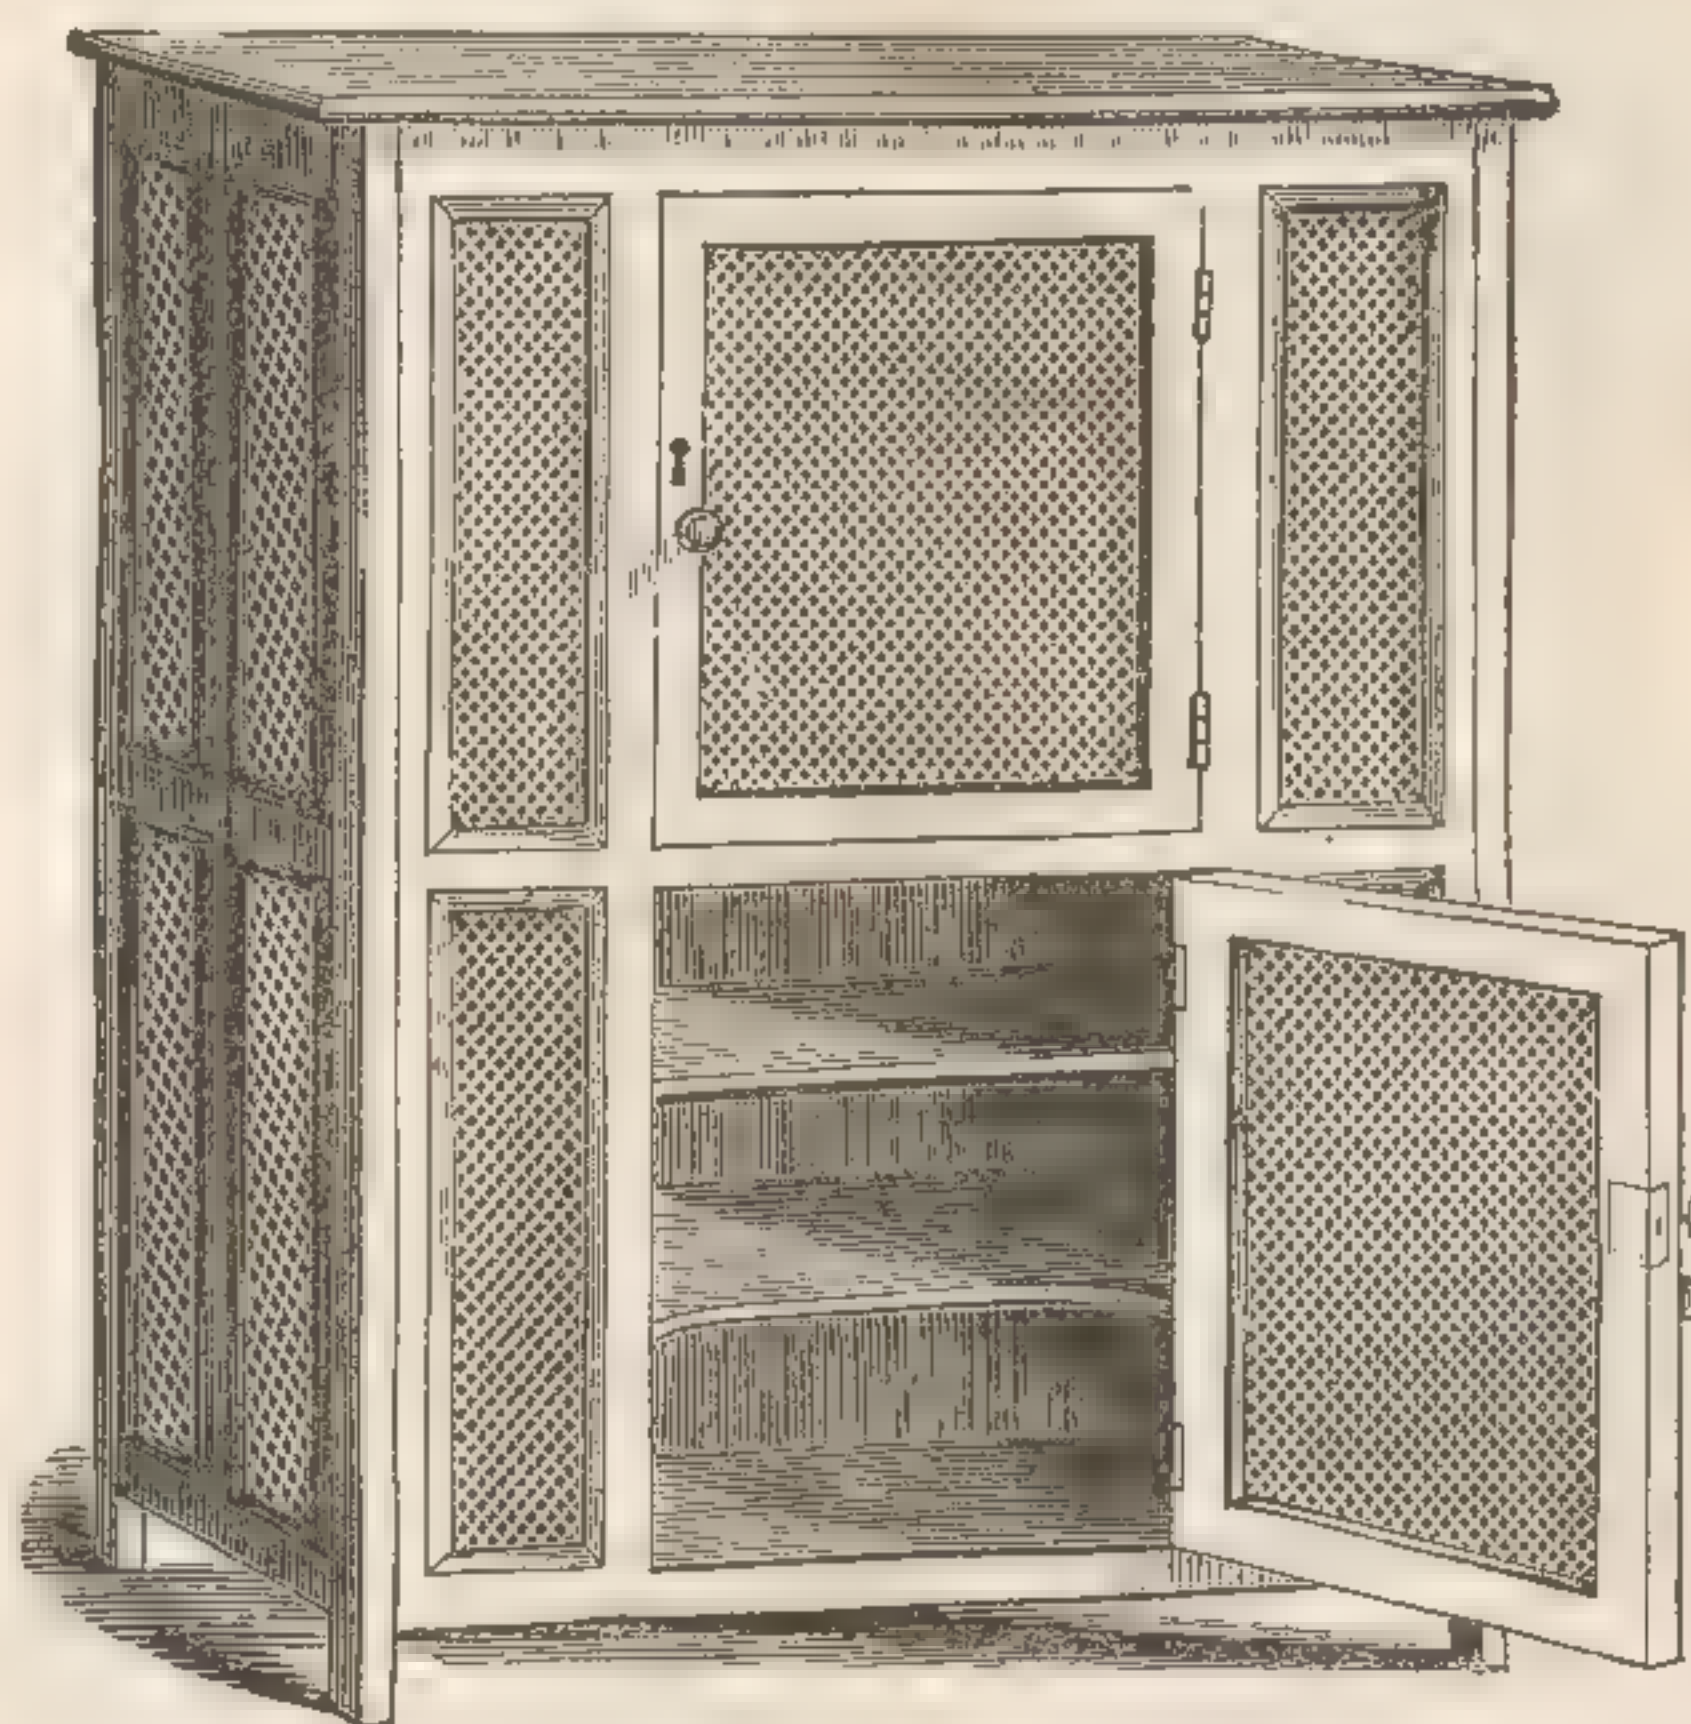

FINISHED IN THE BEST MANNER.

The Meat Safe can be all taken apart, by removing six screws from the top.

# DOUBLE MEAT SAFES.

KNOCK-DOWN.  
TWO APARTMENTS.

Patented January 29th, 1867.

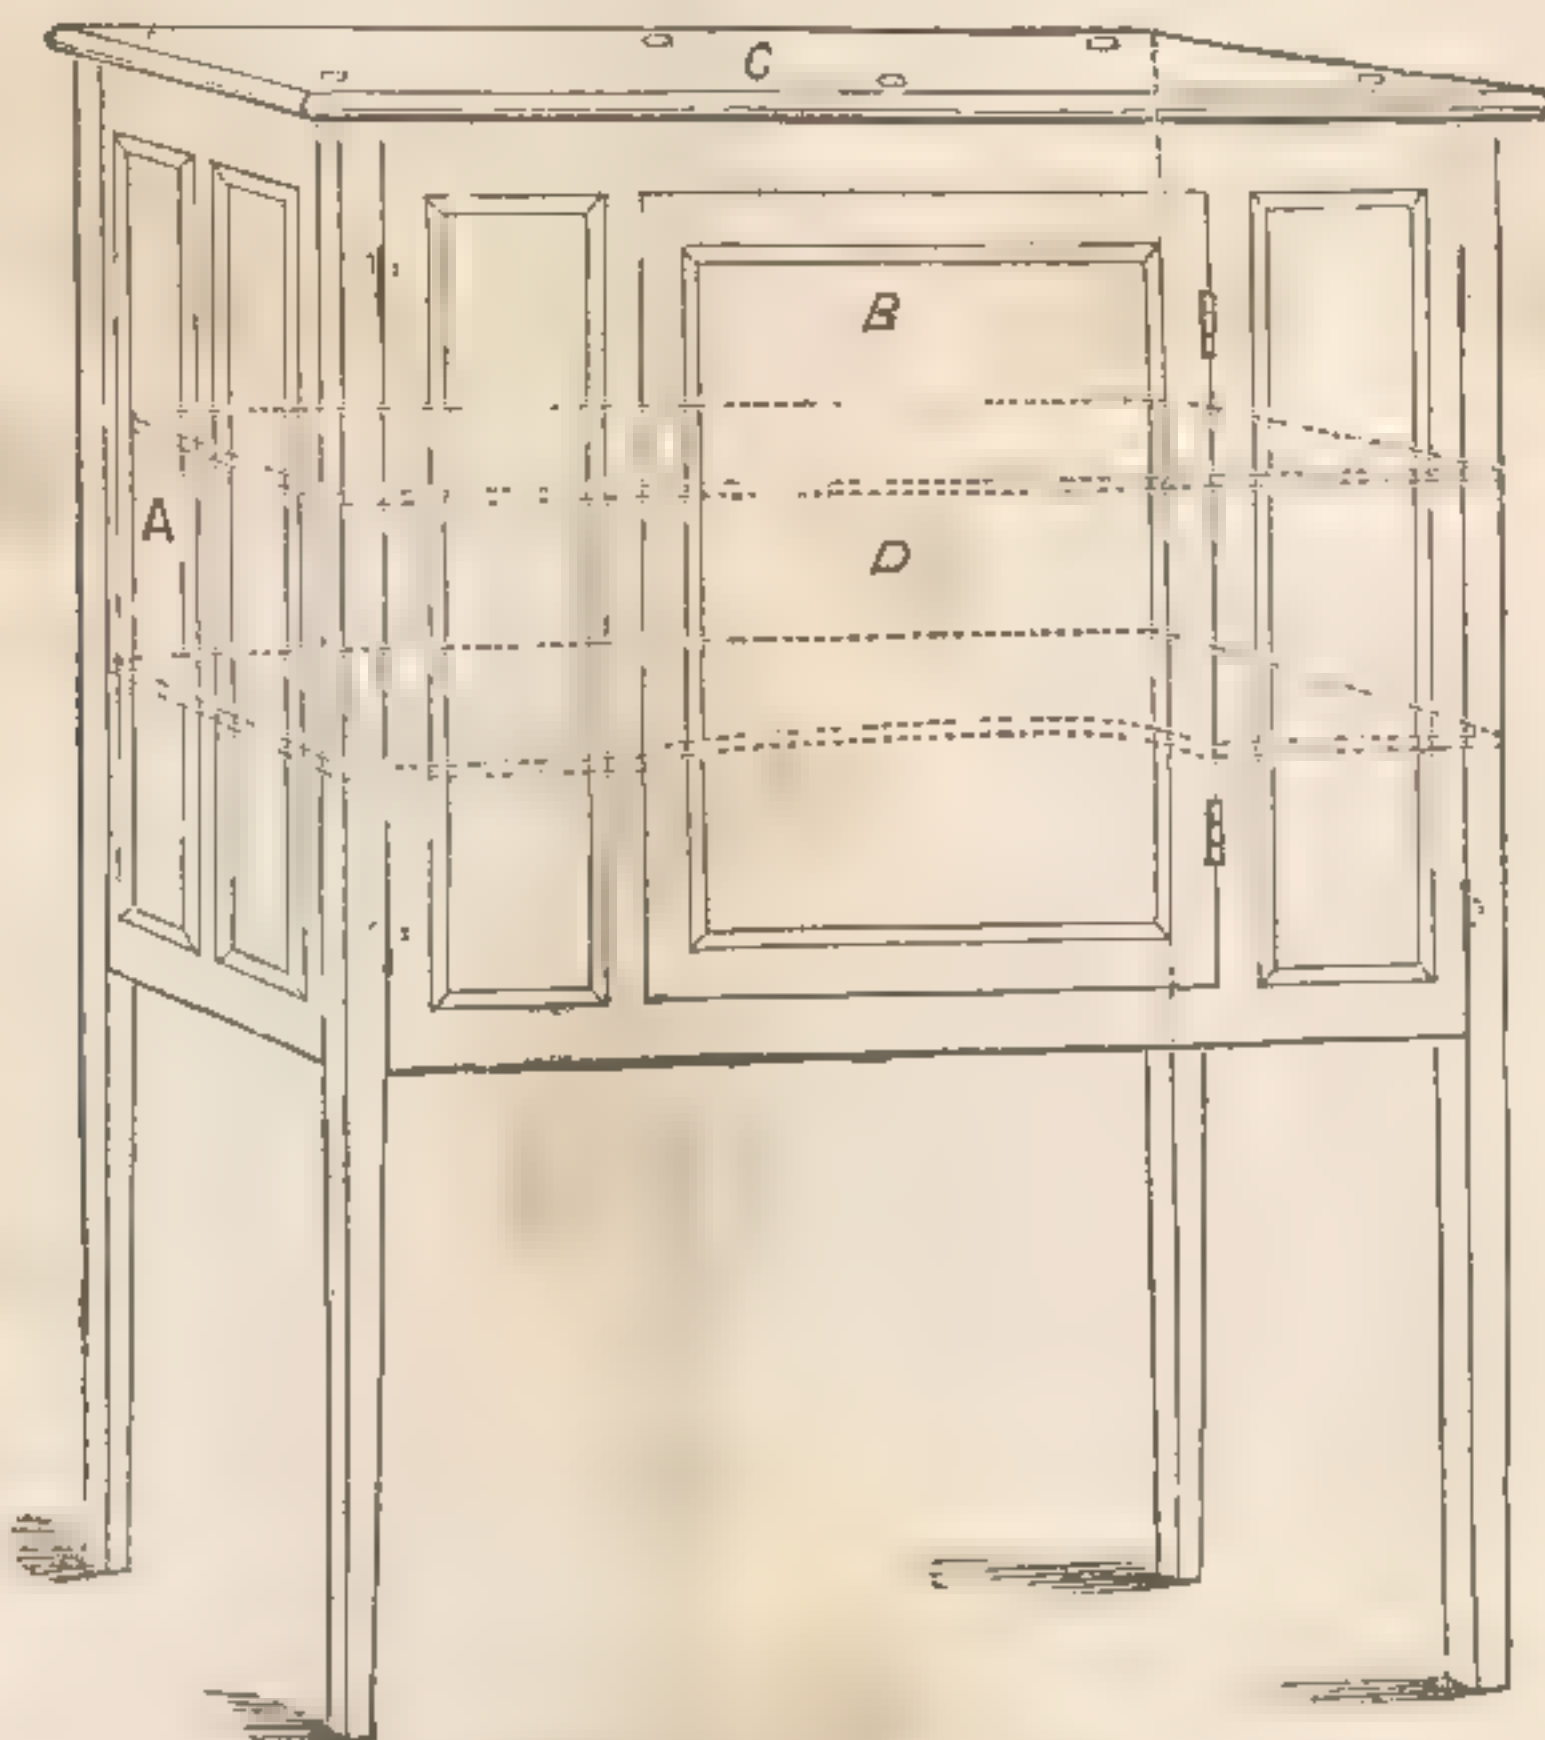

NO.	LENGTH.	WIDTH.	HEIGHT.	Imitation Oak.
1	30 inches.	16 inches.	52 inches.	
2	34 "	17 "	54 "	
3	38 "	18 "	56 "	
4	42 "	19 "	58 "	
5	46 "	20 "	60 "	

The above dimensions include the extreme outside when the Safe is in order for use. As this is the same style of measurement that we give for Refrigerators, customers will readily comprehend the size of each.

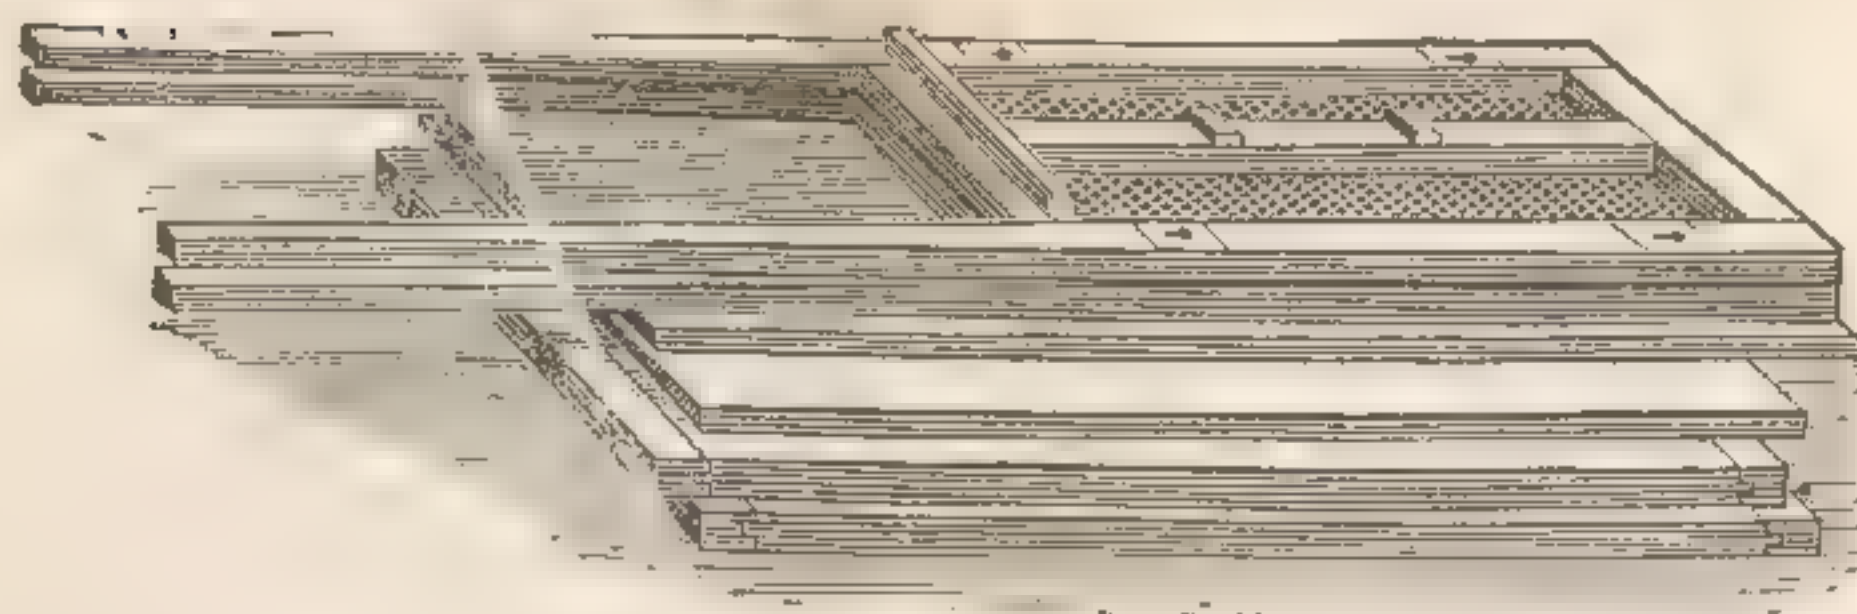

# KNOCK-DOWN MEAT SAFES.

Patented January 29th, 1867.

SECTIONAL VIEW.

READY FOR SHIPPING.

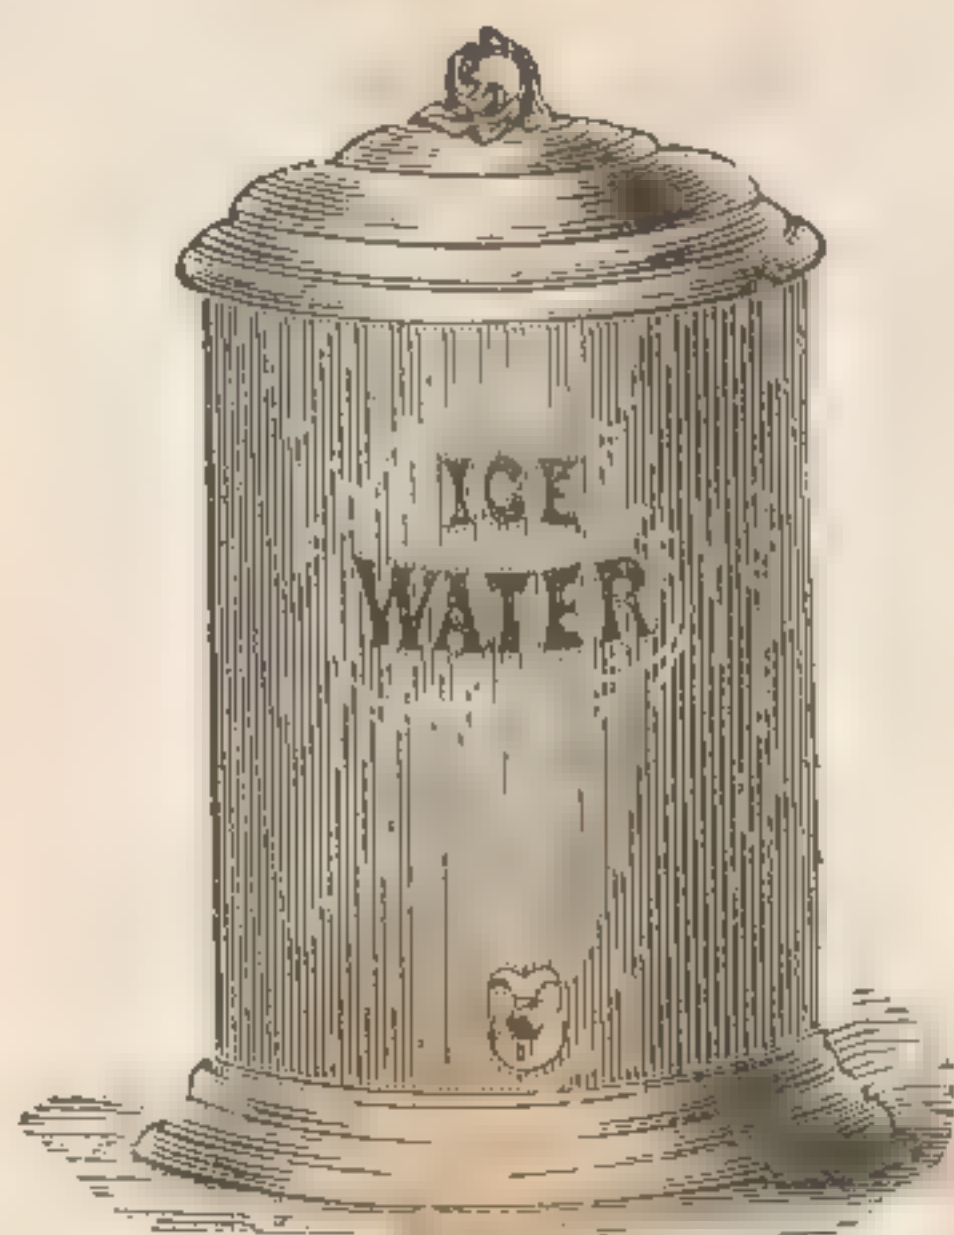

The Meat Safe, packed ready for boxing or shipping. It now occupies about one-quarter the room.

READY FOR USE.				SHIPPING MEASURE	READY FOR USE.				SHIPPING MEASURE.
No. 1	Single.	11 ft.	2 inches.	2 ft. 11 inches.	No. 1	Double.	12 ft. 2 inches.	3 ft. 11 inches.	
" 2	"	15 "	1 "	3 " 7 "	" 2	"	17 " 0 "	4 " 9 "	
" 3	"	18 "	8 "	4 " 1 "	" 3	"	20 " 11 "	5 " 4 "

GENTLEMEN:

The foregoing Cuts, Descriptions and Dimensions we trust will give all the desired information pertaining to our make of

Refrigerators, Meat Safes, Water Coolers

AND

**WOODENWARE,**

also show their usefulness and advantages, and give a more extended idea of the many improvements than formerly.

Remember that the Chest and the Excelsior Upright Improved Refrigerators have the Corrugated "**Galvanized Wrought-Iron Bottom Ice-Rack,**" the acknowledged best improvement ever applied to Refrigerators, consequently we will have

### NO MORE LEAKY REFRIGERATORS.

The MEAT SAFE, which is as universally known as the REFRIGERATOR, we would call your particular attention to. What we claim most is its compactness in storing and shipping.

WATER COOLERS we have constantly on hand, and supply to the trade at short notice.

WOODENWARE, as per foregoing catalogue, constantly on hand and made to order at short notice. We will add other articles as soon as the demand will warrant, and claim all to be first-class in every respect, and as represented. Awaiting orders, and hoping to receive a call from you at your earliest convenience, we remain,

Yours, very respectfully,

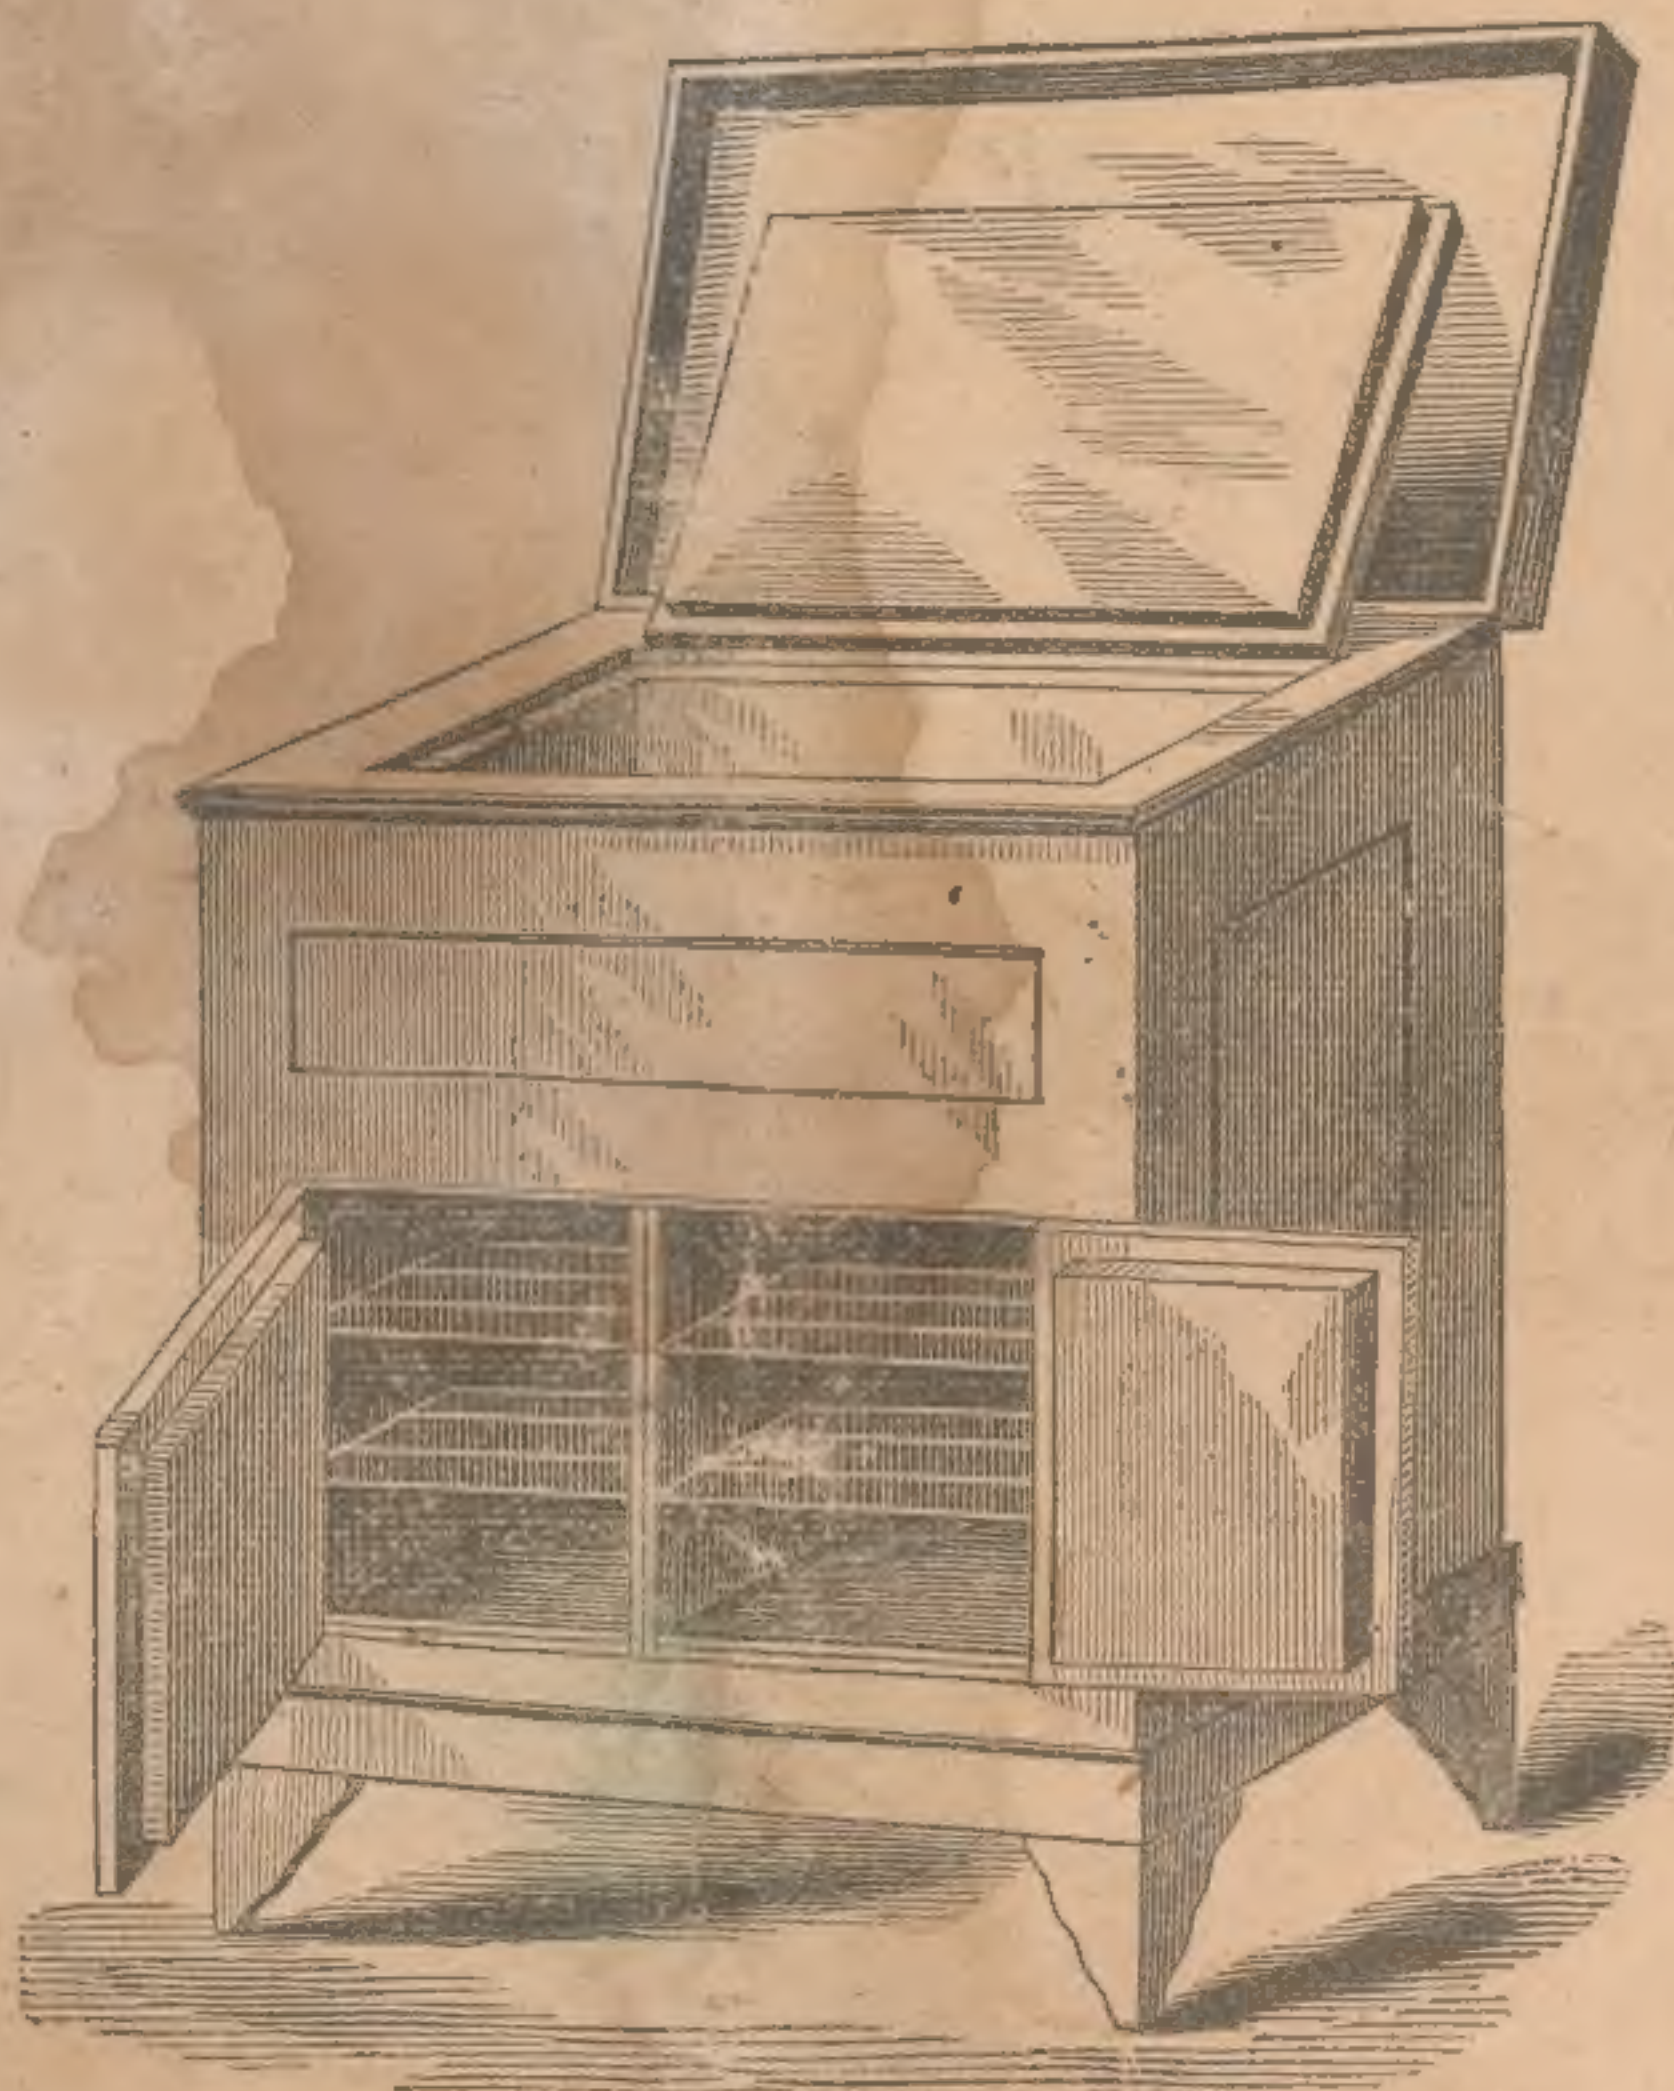

L. H. MACE & CO.

L. H. MACE & CO.
